Representatives And Represented Bases Of Public Support For The American Legislatures:

Representatives and Represented Samuel C. Patterson, George Robert Boynton, Ronald D. Hedlund, 1975 **The Public Side of Representation** Christopher J. Grill, 2012-02-01 Representation lies at the very heart of our political system yet few attempts have been made to examine citizens' views about the representative process. *The Public Side of Representation* fills that void. Through a series of in-depth interviews, Christopher J. Grill explores people's abstract beliefs about representation, expectations for members of Congress, views on the representative constituent relationship, and conceptions of Congress as an institution. The resulting analysis describes what the participants view as the essential building blocks of the representative process, depicts how they think representatives should make voting decisions, explains what they believe are the most important roles for members of Congress, and appraises their understanding of the actual representative process. Highly readable and accessible, *The Public Side of Representation* provides greater insight into American politics, citizens' expectations about government, and the roots of public discontent with the contemporary political process.

Representatives and Represented Samuel C. Patterson, George Robert Boynton, Ronald D. Hedlund, 1975 *The Impact of Legislatures* Philip Norton, 2020-09-10 *The Impact of Legislatures* brings together key articles and path-breaking scholarship published in *The Journal of Legislative Studies* during its first 25 years of publication, enabling the reader to make sense of the impact of legislatures in the modern world. Encompassing theory, comparative analysis, and country-based empirical studies, the volume examines the impact of legislatures as the key representative institutions of nations, addressing their relationships both to government and to the people. Legislatures are ubiquitous; they provide legitimacy to measures of public policy and to government. As such, they are key to how a nation is governed. But they do much more than confer legitimacy. They are generally multi-functional and functionally adaptable bodies and are an essential link between citizen and government. However, scholarship on them has not been extensive and has often been descriptive and country-specific, limiting the capacity to make sense of them as a particular species of institution. The chapters in this volume reflect scholarship that helps the reader appreciate the significance of the place and consequences of legislatures, examining not only the relationship between the legislature and the executive but also the oft-neglected relationship between legislatures and the people. Reflecting the growing body of research in the field of legislative studies carried by *The Journal of Legislative Studies* since its inception in 1995, *The Impact of Legislatures* is essential reading for anyone wishing to understand the impact of legislatures in the world today. Parliaments and Citizens Cristina Leston-Bandeira, 2016-04-22 The relationship between parliaments and citizens is one of the least studied subjects in legislative studies, yet this is a crucial dimension to understand parliaments and the role they play in our political systems. Furthermore, this relationship has gained considerable visibility over the last decade, thanks in part to the development of new media but also as a reaction to the trends of political apathy. In a context of increasing political disengagement, parliamentary discourse shifted attention from the traditionally

predominant relationship with government to the relationship with citizens Issues of legitimacy became more directly associated with the link between parliament and citizens resulting in investment in new and more complex mechanisms for contact with citizens even in the more centralised systems This book looks at a wide range of case studies across Europe and beyond assessing overall strategies in the move towards stronger engagement with citizens It assesses the extent to which the shift in discourse has led to actual changes in parliamentary practice This book was published as a special issue of the Journal of Legislative Studies

Constituent Perceptions of Political Representation: How Citizens Evaluate Their Representatives R. Lauermann, 2013-12-03 This book examines the nature of representation in democracy focusing specifically on the factors shaping constituent evaluations of the US House Representatives and the resulting implications for government

Political Representation in France and Germany Oscar W. Gabriel, Eric Kerrouche, Suzanne S. Schüttemeyer, 2018-06-28 Notwithstanding its contemporary critics political representation remains at the core of democratic politics Based on a comparative research project that gathered data from observations surveys experiments and expert interviews this book examines the process and the quality of political representation in France and Germany from a dual perspective First it analyzes MPs behavior during their district activities Second it investigates the perceptions and evaluations of the represented the French and German citizens In ten chapters different facets of MPs activities as well as citizens attitudes are comparatively investigated The book is relevant for Politics scholars and practitioners at national parliaments to better understand representative democracies and it may also contribute to improve representation itself

Congress And The Decline Of Public Trust Joseph Cooper, 2018-03-05 Since the late 1960s trust in government has fallen precipitously The nine essays composing this volume detail the present character of distrust analyze its causes assess the dangers it poses and suggest remedies The focus is on trust in the Congress The contributors also examine patterns of trust in societal institutions and the presidency especially in light of the Clinton impeachment controversy Among the themes the book highlights are the impacts of present patterns of politics the consequences of public misunderstanding of democratic politics the significance of poll data and the need for reform in campaign finance media practices and civic education

Handbook of Legislative Research Gerhard Loewenberg, 1985 The Handbook of Legislative Research a comprehensive summary of the results of research on nineteenth and twentieth century legislatures is itself a landmark in the evolution of legislative studies Gathered here are surveys by leading scholars in the field each providing inventory of an important subfield an extensive bibliography and a systematic assessment of what has been accomplished and what directions future research must take

In Defense of Politicians Stephen K. Medvic, 2013 Politicians are reviled From jokes on late night TV talk shows to radio show rants and from public opinion polls to ubiquitous conventional wisdom politicians are among the most despised professional class in modern society Drawing on seminal work in political science Stephen K Medvic convincingly argues to the masses that this blanket condemnation of politicians is both unfair and unwarranted While

some individual politicians certainly deserve scorn for misjudgments moral failings or even criminal acts the assumption that all of them should be cast in a similar light is unjustified More importantly that deeply cynical assumption is dangerous to the legitimacy of a democratic system of government Politicians as a class deserve respect not out of blind obedience to authority but because democratic deliberation requires it Medvic explains how cognitive biases in the way people reason often lead us to draw unjustified conclusions of politicians in general based on the malfeasance of some Scandals involving politicians are likely to be remembered and to serve as evidence of the belief that they all do it Most politicians in fact care deeply about their cities states and nation But they face a trap of unrealistic and contradictory expectations from the public about how politicians should behave Medvic in turn demonstrates the necessity of ambition the utility of politics for resolving conflicts peacefully and the value of ideology in framing political choices In the end citizens must learn to tolerate the inherent messiness of politics as the only viable alternative to violent conflict In the process we must embrace our role in the political system as well
