Representing Children's Characters:

Representing Children in Chinese and U.S. Children's Literature Claudia Nelson, Rebecca Morris, 2016-04-08
Bringing together children's literature scholars from China and the United States this collection provides an introduction to the scope and goals of a field characterized by active but also distinctive scholarship in two countries with very different rhetorical traditions. The volume's five sections highlight the differences between and overlapping concerns of Chinese and American scholars as they examine children's literature with respect to cultural metaphors and motifs, historical movements, authorship, didacticism, important themes, and the current status of and future directions for literature and criticism. Wide ranging and admirably ambitious in its encouragement of communication between scholars from two major nations, *Representing Children in Chinese and U.S. Children's Literature* serves as a model for examining how and why children's literature more than many literary forms circulates internationally.

Aesthetic Approaches to Children's Literature Maria Nikolajeva, 2005-05-12 Each chapter includes a short introduction to a specific theoretical approach, an example of its application to a literary text, a number of activities such as study questions and reading exercises, and suggestions for further exploration. Contemporary literary theories discussed include semiotics and hermeneutics, structuralism and narratology, feminist and postcolonial theory, psychoanalysis, and reader response.

The Rhetoric of Character in Children's Literature Maria Nikolajeva, 2002-01-01 Now available in paperback. Until now there was no theoretical research of character in children's fiction, and very few comprehensive theoretical studies of literary characters in general. In her latest intellectual foray, the author of *From Mythic to Linear* ponders the art of characterization. Through a variety of critical perspectives, she uncovers the essential differences between story (what we are told) and discourse (how we are told) and carefully distinguishes between how these are employed in children's fiction and in general fiction. Yet another masterful work by a leading figure in contemporary criticism.

Representing the Holocaust in Children's Literature Lydia Kokkola, 2013-10-15 Writing about the Holocaust and writing for young readers evoke two quite separate sets of concerns which are not always mutually compatible. The first half of *Representing the Holocaust* focuses on how literary material can present historically verifiable material. The second half examines how such materials will be perceived by young readers, whether they will be able to determine any boundaries between fictionality and factuality, and what motivates young readers to keep reading. The work concludes by placing the study in the context of Holocaust education.

Individual Characteristics and Children's Performance in Varied Educational Settings Daniel Solomon, Arthur J. Kendall, 1976

Representation of Disability in Children's Video Games Krystina Madej, 2024-01-10 *Representation of Disability in Children's Video Games* looks at how children's engagement with characters and stories in video games helps create the perception of disability they have as teens and adults. Drawing on child development theory supported by neuroscience, the book shows how the scaffold of information the schema adults have of disability is first created at a very young age as they interact through play with

characters with disabilities in narrative video games. Positing that early video game play experiences should provide exposure to narrative schemas that add understanding and help create meaning about the disability represented, the book presents how such representation in children's video games maps against cognitive development and the psychomotor and cognitive needs and abilities of children. 3-12 Through close readings of over 40 PEGI 3 and PEGI 7 ESRB E 10 games and analysis of games as diverse as Backyard Baseball and Sly Cooper, the author defines broad categories of representation: representation as cosmetic, providing exposure but not game play utility; as incidental, used as a device that provides purpose for the narrative; or as more authentically representing the disability as integral to the character and their life. The book provides readers with an overview of contemporary games that better their understanding of how children's games present disability and how children create their perceptions through interaction with characters and stories. This book will be of interest to academics and students of game studies in topics such as behavioural science, ethics, and HCI, as well as in sociology, communications, and digital media. It is pertinent in particular to game developers and to educators, disability advocates, parents, and policy makers.

CHILDREN'S LITERATURE: J.K. ROWLING'S MASTERY IN PORTRAYAL OF CHARACTERS IN HARRY POTTER SERIES Mrs. Shringar Tiwari, 2018-05-10. Children's literature is not just entertainment; it's a vital tool, says Manorama Jafa, a living treasure of children's literature in India. Hardly anybody takes children's literature seriously in India. In the West, children's literature is a serious discipline. Harry Potter books, written by J.K. Rowling, gained popularity the way no other author has gained. For past ten years, it's Harry Potter's raj, and no more dare step into that sacred territory. *Children's Literacy Development* Catherine McBride-Chang, 2014-02-04. This introduction to child literacy development looks at the subject from an international perspective and is appropriate for students and professionals across a wide range of disciplines.

Gender and the Male Character in 21st Century Fairy Tale Narratives Natalie Le Clue, 2024-09-16. Putting Prince Charming in the academic spotlight, this collection examines the evolution of male fairy tale characters across modern series and films to bridge a gap that afflicts multiple disciplines. *The Borderline Child* Kenneth S. Robson, 1997. Borderline is a particularly difficult diagnostic category by definition: something marginal, something in between, something that changes but remains approximately and recognizably the same. In the words of one contributor to these pages, "Offering solid support to their fellow practitioners, a group of clinicians share a wide range of approaches to the population of seriously disturbed children labelled borderline." Editor and child psychiatrist Kenneth S. Robson, citing the inherent instability of the diagnostic process in childhood, cements the case for gathering the array of authoritative perspectives represented here, among which are descriptive, biochemical, neurological, and psychodynamic.
