May, 2018-05-31 Constitutions can play a central role in responding to environmental challenges such as pollution biodiversity loss lack of drinking water and climate change The vast majority of people on earth live under constitutional systems that protect the environment or recognize environmental rights Such environmental constitutionalism however falls short without effective implementation by policymakers advocates and jurists *Implementing Environmental Constitutionalism Current Global Challenges* explains and explores this implementation gap This collection is both broad and deep While some of the essays analyze crosscutting themes such as climate change and the need for rule of law that affect the implementation of environmental constitutionalism throughout the world others delve deeply into geographically contextual experiences for lessons about how constitutional environmental law might be more effectively implemented This volume informs global conversations about whether and how environmental constitutionalism can be made more effective to protect the natural environment **Tunisia's Economic Development** Mustapha K. Nabli, Jeffrey B. Nugent, 2022-09-16 This book identifies the differences in growth and development and the various factors lying behind them across both Middle East and North African MENA and East Asian

countries over the 1960-2020 period. It considers a very wide range of factors, compares initial situations, institutions, and government policies, the dynamic responses to changing circumstances, and discusses the inability of the governments of the MENA region to achieve not only political reform but also the kinds of economic reform that would allow their citizens to prosper in an increasingly globalized world. The book focuses on Tunisia. Since its independence in 1956 until 2010, Tunisia had considerable success relative to many other MENA countries but was somewhat less successful relative to East Asian countries. Since 2010, however, while transitioning away from autocracy to democracy, it has been in rather serious economic decline. The book highlights how both the factors identified as enabling Tunisia's initial success and those leading to its subsequent decline can provide many useful insights for improving the management of economic development across the whole MENA region and perhaps also to developing countries throughout the world.
