Republicanism Liberty And Commercial Society 1649 1776 The Making Of Modern Freedom:

Republicanism, Liberty, and Commercial Society, 1649-1776 David Wootton, 1994 This examination of republicanism in an Anglo American and European context gives weight not only to the thought of the theorists of republicanism but also to the practical experience of republican governments in England Geneva the Netherlands and Venice

Revolution and the Meanings of Freedom in the Nineteenth Century Isser Woloch, 1996 In the aftermath of the French Revolution freedom came to have a host of meanings This volume examines these contested visions of freedom both inside and outside of revolutionary situations in the nineteenth century as each author explores and interprets the development of nineteenth century political culture in a particular national context The common focus is the struggle in various countries to define advance or delimit freedom after the French Revolution The introductory chapter evokes the problematic relationships between reform and revolution and introduces themes that appear in subsequent chapters though each chapter is a free standing interpretive essay Among the issues addressed are the growth of the public sphere and associational movements battles over constitutionalism parliamentary institutions and the franchise the role of the state in inhibiting or expanding citizenship and the rule of law the resort to violence by parties of order or parties of change and the intrusion of new social questions or ethnic conflicts into the political arena

Freedom and Religion in the Nineteenth Century Richard J. Helmstadter, 1997 The subject of religious liberty in the nineteenth century has been defined by a liberal narrative that has prevailed since Mill and Macaulay to Trevelyan and Commager to name only a few philosophers and historians who wrote in English Underlying this narrative is a noble dream liberty for every person guaranteed by democratic states that promote social progress though not interfering with those broadly defined areas of life including religion that are properly the preserve of free individuals At the end of the twentieth century however it becomes clear that religious liberty requires a more comprehensive subtle and complex definition than the liberal tradition affords one that confronts such questions as gender ethnicity and the distinction between individual and corporate liberty None of the authors in this volume finds the familiar liberal narrative an adequate interpretive context for understanding his particular subject Some address the liberal tradition directly and propose modified versions others approach it implicitly All revise it and all revise in ways that echo across the chapters The topics covered are religious liberty in early America Nathan O Hatch science and religious freedom Frank M Turner the conflicting ideas of religious freedom in early Victorian England J P Ellens the arguments over theological innovation in the England of the 1860 s R K Webb European Jews and the limits of religious freedom David C Itzkowitz restrictions and controls on the practice of religion in Bismarck s Germany Ronald J Ross the Catholic Church in nineteenth century Europe Raymond Grew religious liberty in France 1787 1908 C T McIntyre clericalism and anticlericalism in Chile 1820 1920 Simon Collier and religion and imperialism in nineteenth century Britain Jeffrey Cox

and social life Livesey argues that the European model of democracy was created in the Revolution a model with very specific commitments that differentiate it from Anglo American liberal democracy History of Education Deirdre Raftery, David Crook, 2016-04-08 Specially commissioned to mark the 40th Anniversary of History of Education and containing articles from leading international scholars this is a unique and important volume Over the past forty years scholars working in the history of education have engaged with histories of religion gender science and culture and have developed comparative research on areas such as education race and class This volume demonstrates the richness of such work bringing together some of the leading international scholars writing in the field of history of education today and providing readers with original and theoretically informed research Each author draws on the wealth of material that has appeared in the leading SSCI indexed journal History of Education over the past forty years providing readers with not only incisive studies of major themes but delivering invaluable research bibliographies A must have for university libraries and a must own for historians This book was originally published as a special issue of History of Education Remapping Early Modern England Kevin M. Nineteenth-Century Poetry and Liberal Thought Anna Barton, 2017-11-27 This book explores the relationship between nineteenth century poetry and liberal philosophy It carries out a reassessment of the aesthetic possibilities of liberalism and it considers the variety of ways that poetry by William Wordsworth Elizabeth Barrett Browning Arthur Hugh Clough George Meredith Robert Browning Matthew Arnold and Algernon Charles Swinburne responds to and participates in urgent philosophical social and political debates about liberty and the rule of law It provides an account of poetry's intervention into four different sites where liberalism has a stake the self the university married life and the nation state and it seeks to assert the peculiar capacity of poetry to articulate liberal concerns proposing poetic language as a means of liberal enquiry

Story of American Freedom Eric Foner, 1999-09-07 Freedom is the cornerstone of his sweeping narrative that focuses not only congressional debates and political treatises since the Revolution but how the fight for freedom took place on plantation and picket lines and in parlors and bedrooms **Current Publications in Legal and Related Fields** , 1994

Educating the 'Unconstant Rabble' Ann McGruer, 2010-05-11 The English Revolution was a revolution in reading For the first time more people had access to books and other printed media containing a far broader spectrum of information than had previously been the case But an increase in access to material meant an increase in discussion and expression of opinions some of which had the potential to be detrimental to the stability of the state It was therefore in the interest of the state to restrict access to this material to those that possessed the requisite educational training with which to understand the ideas and opinions now in circulation For Samuel Hartlib John Dury Johan Amos Comenius John Hall John Milton and Marchamont Nedham however the answer lay not in restricting access to information and education but rather in the extension of educational opportunity beyond the governing elite of the country in order to equip the emerging reading public

with the skills they needed to take an active part in the political life of the country In the opinion of these writers it was only through effective educational reform that the political and religious growth of the country could continue A strong theme emerging within the tracts discussed in this book is that an adequately reformed educational system will provide the state with an able and useful populace on which they can depend in times of crisis Allied to this is the notion that the populace is entitled to receive a level of education appropriate to their abilities and talents and that the state bears a responsibility to play at least some part in providing that education whether formally or through the dissemination of information through the printing press As will be seen from the discussion of the literature produced at the time the ideas and reforms suggested within these tracts were the continuation of an intellectual context in which the development of learning and the expansion of knowledge were seen as paramount Drawing on the religious ideas of the millennium as well as the philosophical ideas of Bacon especially the writers to be considered here sought the reformation of the educational system as well as a broader series of social reforms in order to perfect the Reformation and make England ready for the new age
