Diversity Issues in Substance Abuse Treatment and Research Sana Loue, 2007-06-02 Although the term diversity is widely used there is often no agreed-upon meaning as to its meaning or how attention to diversity should be operationalized within the context of programming or research This text provides a foundation for the examination of such issues with suggestions for the integration of various approaches into substance use treatment programs and research The impetus for this work derived from multiple interactions over a period of several years with colleagues students research participants and community based providers who noted the frequent inattention paid to such concerns in the context of treatment and research often despite an acknowledgment of a group's particular historical legacy in the United States and the impact of that history on the initiation and prolongation of substance use within a specific community or the barriers to treatment that may have resulted

Chapter 1 defines what is meant by diversity through an examination of related terms such as culture ethnicity race sex gender and sexual orientation Clearly this discussion does not and cannot reflect all possible permutations of human existence that reflect diversity For instance although the text does make mention of considerations related to religious differences and cognitive capacity neither is highlighted as a separate topic Additionally the emphasis on specific groups is not meant to imply

that other groups such as Euro Americans or heterosexual men do not have concerns that may differ from those of other communities and that deserve consideration in the development and implementation of programs and research endeavors However trite it may seem one text cannot do it all Marijuana Research Findings, 1980 Robert C.
