prehistoric Andean economy and polity The Economics of Ecosystems and Biodiversity: Ecological and Economic Foundations Pushpam Kumar, 2012-12-20 Human well being relies critically on ecosystem services provided by nature. Examples include water and air quality regulation, nutrient cycling and decomposition, plant pollination and flood control, all of which are dependent on biodiversity. They are predominantly public goods with limited or no markets and do not command any price in the conventional economic system so their loss is often not detected and continues unaddressed and unabated. This in turn not only impacts human well being but also seriously undermines the sustainability of the economic system. It is against this background that TEEB The Economics of Ecosystems and Biodiversity project was set up in 2007 and led by the United Nations Environment Programme to provide a comprehensive global assessment of economic aspects of these issues. This book, written by a team of international experts, represents the scientific state of the art, providing a comprehensive assessment of the fundamental ecological and economic principles of measuring and valuing ecosystem services and biodiversity and showing how these can be mainstreamed into public policies. This volume and subsequent TEEB outputs will provide the authoritative knowledge and guidance to drive forward the biodiversity conservation agenda for the next decade.

Social Impact Analysis And Development Planning In The Third World William Derman, Scott Whiteford, 2019-06-26 Although national governments and international agencies have committed vast sums of money to development, many projects have not only failed to improve the lives of the poor but in some cases have created additional social and economic problems. Such failures can often be traced to an inadequate understanding of the socio-cultural reality of the people most directly affected and to a lack of their participation in project planning, implementation and evaluation. In this collection of essays, scholars and practitioners from diverse disciplines examine many of the perplexing social issues of development planning from the perspective of social impact analysis. Drawing on national, regional and local case studies, the authors demonstrate why sociocultural factors are seldom adequately understood and discuss how they can be effectively incorporated into the planning process.

The Wintu & Their Neighbors Christopher K. Chase-Dunn, Kelly Marie Mann, 1998-10 On the cutting edge of world systems theory comes *The Wintu and Their Neighbors*, the first case study to compare and contrast systematically an indigenous Native American society with the modern world at large. Using an interdisciplinary approach that combines sociology, anthropology, political science, geography and history, Christopher Chase-Dunn and Kelly M. Mann have scoured the archaeological record of the Wintu, an aboriginal people without agriculture, metallurgy or class structure who lived in the wooded valleys and hills of northern California. By studying the household composition, kinship and trade relations of the Wintu, they call into question some of the basic assumptions of prior sociological theory and analysis. Chase-Dunn and Mann argue that Immanuel Wallerstein's world systems perspective, originally applied only to the study of modern capitalistic societies, can also be applied to the study of the social, economic and political relationships in small stateless societies. They contend that despite the fact that the Wintu appear on the surface to

have been a household based society this indigenous group was in fact involved in a myriad of networks of interaction which resulted in intermarriage and which extended for many miles around the region These networks which were not based on the economic dominance of one society over another a concept fundamental to Wallerstein s world systems theory led to the eventual expansion of the Wintu as a cultural group Thus despite the fact that the Wintu did not behave like a modern society lacking wealth accumulation class distinctions and cultural dominance Chase Dunn and Mann insist that the Wintu were involved in a world system and argue therefore that the concept of the minisystem should be discarded They urge other scholars to employ this comparative world systems perspective in their research on stateless societies
