Research In Higher Education:

Community-Based Research and Higher Education Kerry J. Strand, Nicholas Cutforth, Randy Stoecker, Sam Marullo, Patrick Donohue, 2003-06-03 Community Based Research and Higher Education is the long awaited guide to how to incorporate a powerful and promising new form of scholarship into academic settings The book presents a model of community based research CBR that engages community members with students and faculty in the course of their academic work Unlike traditional academic research CBR is collaborative and change oriented and finds its research questions in the needs of communities This dynamic research model combines classroom learning with social action in ways that can ultimately empower community groups to address their own agendas and shape their own futures At the same time it emphasizes the development of knowledge and skills that truly prepare students for active civic engagement

Engaged Research and Practice Betty Overton, Penny A. Pasque, John C. Burkhardt, 2023-07-03 What practices can researchers use to gain a more nuanced understanding of educational issues in the community and be part of the solution to those issues Engaged Research and Practice is about two prevailing and complementary ideas that have surfaced in the higher education arena engaged research and higher education for the public good Engaged research is scholarship that not only attempts to open up new knowledge but it does so with a sense that the new knowledge insight and directions have a direct relationship to needs and problems within our communities institutions and policy arenas Engaged actionable or participatory research and scholarship attempts to tackle the identified issues of our communities and society This handbook offers important insights and tangible examples of how higher education leaders may work directly with communities and in policy settings to understand the deeper meanings often lost in conversations about educational opportunity Each chapter addresses the ways in which faculty community and administrative leaders may connect research and practice through unique research projects The authors offer clear explanations of how their engaged research was conducted to illustrate explicit pathways for practitioners This book also includes short narratives where authors involved with this research reflect on their experiences and the lessons they have learned while immersed in community and policy related work
