Wall, 2017-07-05 This volume presents the reader with an interesting and at times provocative selection of contemporary thinking about cybercrimes and their regulation The contributions cover the years 2002 2007 during which period internet service delivery speeds increased a thousand fold from 56kb to 56mb per second When combined with advances in networked technology these faster internet speeds not only made new digital environments more easily accessible but they also helped give birth to a completely new generation of purely internet related cybercrimes ranging from spamming phishing and other automated frauds to automated crimes against the integrity of the systems and their content In order to understand these developments the volume introduces new cybercrime viewpoints and issues but also a critical edge supported by some of the new research that is beginning to challenge and surpass the hitherto journalistically driven news stories that were once the sole source of information about cybercrimes Andragogical Instruction for Effective Police Training Robert F. Vodde, 2009 This book details a 2 year study that examined and compared

the efficacy of an andragogical instructional methodology to that of a traditional prescriptive pedagogical and militaristic format of basic police training The study not only revealed that an andragogical approach yielded greater outcomes in terms of skills and competencies but was preferred among recruits in great part due to the emphasis placed on experiential learning and a collegiate and collaborative approach to learning In his research Robert F Vodde identified six thematic categorical constructs by which basic police training programs can be organized and administered to include the importance for not only working within a quasi military hierarchal organizational structure but in preparing recruits for the emotional and physical challenges associated with police work When properly administered an andragogical approach represents a well planned and skillfully orchestrated process that holistically integrates all aspects of the curriculum one that capitalizes on the use of multi sensory experiential hands on learning activities that allow recruits to apply what they have learned Considering the short and long term impacts of basic police training Vodde illuminates in this book that an andragogical instructional methodology serves as a pragmatic effective and responsive approach to training it is one that creates a physical and psychological climate that takes into consideration the affective needs of the recruit thus providing for a healthy engaging challenging and collaborative atmosphere in which future police officers develop a clear understanding and perspective of their role within the greater context of society
