A. N. Wilson

Lord Melbourne 1779 1848:

Lord Melbourne, 1779-1848 Leslie George Mitchell, 1997 Lord Melbourne was Prime Minister of England from 1834 to 1841. As mentor and father figure to the young Queen Victoria, he exerted considerable influence over the first few years of her reign. He was a man to whom career success came rather late; he was forty-eight years old before he held any major governmental office. In a profound way, his character and thinking had already been determined by experiences outside politics, particularly by his Whig social background and his disastrous marriage to Lady Caroline Lamb. In this, the first biography for twenty years, Leslie Mitchell uses the Melbourne family papers to explore the man behind a politician at the heart of early Victorian politics. William Lamb, the second Viscount Melbourne, might have held office earlier had it not been for his marriage to Lady Caroline Ponsonby, whose scandalous public affairs, including one with Byron, preceded a descent into madness and separation from her husband. Her death in 1828 freed Melbourne to take up the career which was almost his birthright. His views and subsequent political rise and survival in high office, almost by accident rather than design, reveal much about the nature of Whig politics operating as an extension of family relationships and the expression of the shared values of an elite. As Prime Minister, Melbourne became the closest adviser and father figure to the new queen, who was only eighteen years old at her accession in 1837. Her rejection of Melbourne on her marriage to Prince Albert was abrupt and devastating, and Melbourne never really recovered from it. He became a marginalized figure out of step with the demands of a fast-changing, newly industrialized world. In this fascinating account, Leslie Mitchell fully explores the private and public life of a man destined for high office and greatly influenced by the women in his life. **Lord Melbourne**, 1849 **Lady**

Caroline Lamb P. Douglass, 2015-12-17 Lady Caroline Lamb, among Lord Byron's many lovers, stands out vilified, portrayed as a self-destructive nymphomaniac. Her true story has never been told. Now Paul Douglass provides the first unbiased treatment of a woman whose passions and independence were incompatible with the age in which she lived. Taking into account a traumatic childhood, Douglass explores Lamb's so-called erotomania and tendency towards drug abuse and madness, problems she and Byron had in common. In this portrait, she emerges as a person who sacrificed much for the welfare of a sick child and became an artist in her own right. Douglass illuminates her novels and poetry, her literary friendships, and the lifelong support of her husband and her publisher John Murray. **The Victorian Palace of Science**

Edward J. Gillin, 2017-11-09 The Palace of Westminster, home to Britain's Houses of Parliament, is one of the most studied buildings in the world. What is less well known is that while Parliament was primarily a political building when built between 1834 and 1860, it was also a place of scientific activity. The construction of Britain's legislature presents an extraordinary story in which politicians and officials laboured to make their new Parliament the most radical modern building of its time by using the very latest scientific knowledge. Experimentalists employed the House of Commons as a chemistry laboratory; geologists argued over the Palace's stone; natural philosophers hung meat around the building to measure air purity; and

mathematicians schemed to make Parliament the first public space where every room would have electrically controlled time Through such dramatic projects Edward J Gillin redefines our understanding of the Palace of Westminster and explores the politically troublesome character of Victorian science Outrage in the Age of Reform Jay R.
