Loretta Lux Wim van Sinderen,2004 *Loretta Lux* Loretta Lux,Stefan Schmid,2000 **Loretta Lux** Francine Prose,2005 Though the sense of realism in German photographer Loretta Lux s striking portraits of children remains eerily intact Lux does not strive to create faithful photographic representations of her young subjects Instead each image invariably comprised of a lone child in a sparse landscape is painstakingly composed and manipulated to create psychically charged explorations of the nature of childhood and the process of self discovery Originally trained as a painter Lux continues to draw influence from paintings by old masters such as Velasquez Goya and Runge This influence is especially apparent in Lux s compositions After carefully choosing the models costumes and backdrops sometimes using her own paintings she digitally combines and enhances each element to form meticulously structured tableaux The consistently forlorn expressions of her models combined with the hyperreality of the image create portraits that transcend their subjects and remind us that childhood is as chaotic and multidimensional as any other part of life *Train Your Gaze* Roswell Angier,2020-09-03 Focusing on the presence of the photographer s gaze as an integral part of constructing meaningful images Roswell Angier combines theory and practice to provide you with the technical advice and inspiration you need to develop your skills in portrait photography Fully updated to take into account advances in creative work and photographic technology this second edition also includes stunning new visuals and a discussion on the role of social media in the practice of portraiture Each chapter includes a practical assignment designed to help you explore various kinds of portrait photography and produce a range of different styles for your creative portfolio **American Photo** ,2005-05 **Loretta Lux** Loretta Lux,Jorge Contreras,Jorge Contreras Chacel,Nina Zambrano,Museo de Arte Contemporáneo,2008 **30-Second Photography** Brian Dilg,Adiva Koenigsberg,2015-05-11 Who invented photography first Fox Talbot or Louis Daguerre Who got the patent Who made the most money Who are the greatest photographers and what have their contributions been This book takes the 50 most important aspects of photography both the major styles and the key technical aspects that make them possible and explains each in two pages 300 words and one picture The book also includes six profiles of the greatest names in the history of photography and shares their contributions Whether you pick it up for 30 seconds at a time or read it from cover to cover this book is guaranteed to have you thinking about your own and other people s photography in a whole new way

Photography and Germany Andrés Mario Zervigón, 2017-05-15 The idea of photography in Germany evokes everything from the pioneering modernist pictures of the Weimar era to the colossal digital prints that define art photography today But it also recalls horrifying documents of wartime atrocities and the relentless surveillance of East German citizens Photography and Germany broadens these perceptions by examining the medium's multi faceted relationship with Germany's turbulent cultural political and social history while rethinking the notion of German photography with fresh insights on its historical context Andr s Mario Zervig n covers this history from the region's pre photographic experiments with light sensitive chemicals to today's tension between analog and digital technologies Rather than simply providing a survey of German photography however he focuses on how the medium as a product of the modern age has intervened in a fraught project of national imagining often to productive ends but sometimes to catastrophic results Richly illustrated with numerous previously unpublished images Photography and Germany is the first single authored history of photography in Germany ever published one that deepens our broader understanding of how photography cultivates notions of a nation and its inhabitants
