Sure Seaters Barbara Wilinsky, 2001-01-01 By the end of the Second World War a growing segment of the American filmgoing public was wearying of mainstream Hollywood films and began to seek out something different In major cities and college towns across the country art film theaters provided a venue for alternatives to the films playing in main street movie palaces British foreign language and independent American films as well as documentaries and revivals of Hollywood classics A skeptical film industry dubbed such cinemas sure seaters convinced that patrons would have no trouble finding seats there However with the success of art films like Rossellini's *Open City* and Mackendrick's *Tight Little Island* the meaning of the term sure seater changed and by the end of the 1940s reflected the frequency with which art house cinemas filled all their seats Wilinsky examines the development of the theaters that introduced such challenging personal and artistic films as *The Bicycle Thief* and *The Red Shoes* to American audiences and offers a more complete understanding of postwar popular culture and the often complicated relationship between art cinema and the commercial film industry that ultimately shaped both and resulted in today's vibrant film culture from back cover

 when the Supreme Court overturned the last state anti miscegenation law *Loving v Virginia* Lubin's study however suggests
 that we cannot fully understand contemporary debates about hybridity or mixed race identity without first comprehending
 how WWII changed the terrain The book focuses on the years immediately after the war when ideologies of race gender and
 sexuality were being reformulated and solidified in both the academy and the public Lubin shows that interracial romance
 particularly between blacks and whites was a testing ground for both the general American public and the American

Militarization and Democracy in West Germany's Border Police, 1951-2005 David M. Livingstone, 2024 A social history of West Germany's Bundesgrenzschutz BGS Federal Border Police that complicates the telling of the country's history as a straightforward success story The 2020 murder of George Floyd by Minneapolis police officers shows that police violence is still a problem in Western democracies Floyd's murder prompted some critics to hail the German police as a model of democratic policing that should be emulated After 1945 Germany's police forces had supposedly shed the militarization and authoritarian impulses still prevalent in other nations' forces These uncritical appraisals however deserve closer analysis This book is a social history of West Germany's Bundesgrenzschutz BGS a federal border guard established in 1951 that became reunified Germany's first national police force It argues that the BGS revived authoritarian traditions of militarized policing and kept them alive long into the postwar era even though the country was supposedly consigning these problematic legacies to its past The BGS was staffed and led by Wehrmacht and SS veterans until the late 1970s and while West Germany was democratizing BGS commanders were still planning to fight wars and were teaching its officers street fighting tactics While the end outcome was positive the study contributes to the growing body of recent research that complicates the writing of the Federal Republic's history as a success story Dealing explicitly with post fascist West Germany's struggle to establish a democratic police force the book enters a conversation with studies concerned with democratization security and Germany's effort to overcome its Nazi past DAVID M LIVINGSTONE holds a PhD in History from the University of California San Diego He is retired as Chief of Police of Simi Valley California and is an adjunct professor at California Lutheran University

Flesh and Blood Susan E. Lederer, 2008-04-24 Organ transplantation is one of the most dramatic interventions in modern medicine Since the 1950s thousands of people have lived with new hearts kidneys lungs corneas and other organs and tissues transplanted into their

bodies From the beginning though there was simply a problem surgeons often encountered shortages of people willing and able to give their organs and tissues To overcome this problem they often brokered financial arrangements Yet an ethic of gift exchange coexisted with the commodification of the body The same duality characterized the field of blood transfusion which was essential to the development of modern surgery This book will be the first to bring together the histories of blood transfusion and organ transplantation It will show how these two fields redrew the lines between self and non self the living and the dead and humans and animals Drawing on newspapers magazines legal cases films and the papers and correspondence of physicians and surgeons Lederer will challenge the assumptions of some bioethicists and policymakers that popular fears about organ transplantation necessarily reflect timeless human concerns and preoccupations with the body She will show how notions of the body intact in parts living and dead are shaped by the particular culture in which they are embedded
