Permanent Liminality and Modernity Arpad Szakolczai,2016-10-04 This book offers a comprehensive sociological study of the nature and dynamics of the modern

world through the use of a series of anthropological concepts including the trickster schismogenesis imitation and liminality. Developing the view that with the theatre playing a central role the modern world is conditioned as much by cultural processes as it is by economic technological or scientific ones the author contends the world is to a considerable extent theatrical a phenomenon experienced as inauthenticity or a loss of direction and meaning. As such the novel is revealed as a means for studying our theatricalised reality not simply because novels can be understood to be likening the world to theatre but because they effectively capture and present the reality of a world that has been thoroughly theatricalised and they do so more effectively than the main instruments usually employed to analyse reality philosophy and sociology. With analyses of some of the most important novelists and novels of modern culture including Rilke Hofmannsthal Kafka Mann Blixen Broch and Bulgakov and focusing on fin de siècle Vienna as a crucial threshold chronotope of modernity Permanent Liminality and Modernity demonstrates that all seek to investigate and unmask the theatricalisation of modern life with its progressive loss of meaning and our deteriorating capacity to distinguish between what is meaningful and what is artificial. Drawing on the work of Nietzsche Bakhtin and Girard to examine the ways in which novels explore the reduction of human existence to a state of permanent liminality in the form of a sacrificial carnival this book will appeal to scholars of social anthropological and literary theory.

The Cambridge Companion to the Modern German Novel Graham Bartram, 2004-04-05 The Cambridge Companion to the Modern German Novel first published in 2004 provides a broad ranging introduction to the major trends in the development of the German novel from the 1890s to the present. Written by an international team of experts it encompasses both modernist and realist traditions and also includes a look back to the roots of the modern novel in the Bildungsroman of the late eighteenth and nineteenth centuries. The structure is broadly chronological but thematically focused chapters examine topics such as gender anxiety images of the city war and women's writing within each chapter key works are selected for close attention. Unique in its combination of breadth of coverage and detailed analysis of individual works and featuring a chronology and guides to further reading this Companion will be indispensable to students and teachers.

Reading Matters Joseph Tabbi, Michael Wutz, 2018-05-31 The convergence of twentieth century narrative and technology is one of the most important developments in current literary study. A decade after the founding of the Society for Literature and Science and the appearance of such influential books as Kathleen Woodward's *Culture of Information* and William Paulson's *The Noise of Culture* Joseph Tabbi and Michael Wutz have edited a landmark volume to summarize this still emerging field. Twelve original essays and the editors' introductory overview show how these theoretical concerns can contribute to the practical study of narrative. *Reading Matters* covers the range of contemporary literature from the canonical novels of high modernism and postmodernism through subjects new to the academic agenda such as cyberpunk and hypertext fiction. In an age that has proclaimed the death of the novel many times over the contributors argue persuasively for the continued vitality of literary narrative. By responding in ingenious ways to the capabilities of other media they assert

the novel has enlarged and redefined its territory of representation and its range of techniques and play while maintaining its viability in the new media assemblage The Architecture of Narrative Time Erica Wickerson,2017 Scholars and students of modern literature anyone with an interest in the work of Thomas Mann **Reason and Cause** Richard Ned Lebow,2020-03-12 Philosophy and social science assume that reason and cause are objective and universally applicable concepts Through close readings of ancient and modern philosophy history and literature Richard Ned Lebow demonstrates that these concepts are actually specific to time and place He traces their parallel evolution by focusing on classical Athens the Enlightenment through Victorian England and the early twentieth century This important book shows how and why understandings of reason and cause have developed and evolved in response to what kind of stimuli and what this says about the relationship between social science and the social world in which it is conducted Lebow argues that authors reflecting on their own social context use specific constructions of these categories as central arguments about the human condition This highly original study will make an immediate impact across a number of fields with its rigorous research and the development of an innovative historicised epistemology Climatological Data ,1950 **Hourly Precipitation Data** ,1961
