Catching Butterflies Maria Takolander, 2007 Magical realism was one of the most significant literary developments in the last century It has become synonymous with the seductive fictions of writers such as Gabriel Garc a M rquez Salman Rushdie Toni Morrison Ben Okri Jeanette Winterson and Peter Carey However the genre has also become known for its theoretical indeterminacy In fact exoticist speculation inspired by the links between magical realist literature and the world s cultural or political margins has thrown the category into critical disrepute This book rescues magical realism from misreadings and misdemeanours tracing the historical development of the literary genre and analysing an original spectrum of magical realist texts from Latin America Africa India Canada the US the UK and Australia It asks such questions as How did magical realism come to take over the world What is the nature of its allure Also how does the marginal status of its authors inform the genre Does magical realism have a political agenda This book uses postcolonial theory to investigate notions of cultural identity and post structural theory to examine the narrative strategies of magical realism presenting a comprehensive historical and theoretical overview of the genre and a politically urgent argument about its subversive potentialities

Lies that Tell the Truth Anne C. Hegerfeldt, 2005 Magic realism has long been treated as a phenomenon restricted to postcolonial literature Drawing on works from Britain Lies that Tell the Truth compellingly shows how magic realist fiction can be produced also at what is usually considered to be the cultural centre without forfeiting the mode's postcolonial attitude and aims A close analysis of works by Angela Carter Salman Rushdie Jeanette Winterson Robert Nye and others reveals how the techniques of magic realism generate a complex critique of the West's rational empirical worldview from within a Western context itself Understanding magic realism as a fictional analogue of anthropology and sociology Lies that Tell the Truth reads the mode as a frequently humorous but at the same time critical investigation into people's attempts to make sense of their world By laying bare the manifold strategies employed to make meaning magic realist fiction indicates that knowledge and reality cannot be reduced to hard facts but that people's dreams and fears ideas stories and beliefs must equally be taken into account

Mind in Art Charles M. Dorn, 1999 This book is for the reader who believes that thinking about and making art is intelligent behavior and that art as a subject in the K 12 school curriculum should not be used as an alibi for other curricular objectives It examines and makes explicit those cognitive behaviors normally associated with most higher order thinking and problem solving activity and explains how they function in the act of creative forming Its goal is ultimately to find ways to use these behaviors in the construction of an intelligent art curriculum for K 12 American schools This is perhaps the only text in the field designed to assist teachers in meeting the challenges of teaching in the Goals 2000 curriculum and evaluation reform effort acquainting them with both the National Art Standards and with the assessment processes needed in order for them to become accountable Mind in Art grapples with current and relevant theory research and unsolved problems It is cohesive as it attempts to bring together information that is only partially known even among those who are college professors And it takes a critical look at the ideas and points of view that have created divisiveness and shabby thinking in the field In this book Charles Dorn significantly advances thinking in the field of art education

Art and Revolution in Latin America, 1910-1990 David Craven, 2006-01-01 In this uniquely wide ranging book David Craven investigates the extraordinary impact of three Latin American revolutions on the visual arts and on cultural policy The three great upheavals in Mexico 1910 40 in Cuba 1959 89 and in Nicaragua 1979 90 were defining moments in twentieth century life in the Americas Craven discusses the structural logic of each movement s artistic project by whom how and for whom artworks were produced and assesses their legacies In each case he demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders The book not only examines specific artworks originating from each revolution s attempt to deal with the challenge of socializing the arts but also the engagement of the working classes in Mexico Cuba and Nicaragua with a tradition of the fine arts made newly accessible through social transformation Craven considers how each revolution dealt with the pressing problem of creating a dialogical art one that reconfigures the existing artistic resource rather than one that just reproduces a populist art to keep things as they were In addition the author charts the impact on the revolutionary processes of theories of art and education articulated by such thinkers as John Dewey and Paulo Freire The book provides a fascinating new view of the Latin American revolutionaries from artists to political leaders who defined art as a fundamental force for the transformation of society and who bequeathed new ways of thinking about the relations among art ideology and class within a revolutionary process

Classical American Philosophy Rebecca L. Farinas, 2021-01-14 In *Classical American Philosophy Poiesis in the Public Square* Rebecca Farinas takes seven major figures from the American philosophical canon and examines their relationship with an artistic or scientific interlocutor It is a unique insight into the origins of American philosophy and through case studies such as the friendship between Alain Locke and the biologist E E Just and the collaboration between Jane Addams and George Herbert Mead Farinas provides a new insight into these thinkers ideas Her new perspective allows her to move beyond relational aesthetics to consider these theorists phenomenological metaphysical religious and cosmological ideas and reapply them to the modern world Indeed the partnerships she examines have proved especially valuable to newer philosophical fields like value theory ethics pedagogy and semiotics Her links between art and science also provide new vantage points on our society s continuing artistic endeavours and technological advances and introduce an exciting new perspective on early American philosophy and its ensuing movements

Voices and Silences Anjali Singh, 2022-10-06 Indian indentured emigration is among the most notable social phenomena of modern history which sent over one million men and women to tropical sugar colonies in the Atlantic Pacific and Indian oceans Indenture began in the 1830s and lasted till 1920 a period which finds little or no mention either in history textbooks or in literature This book takes a closer look at some of the important narratives on indenture and evaluates them in order to highlight the experience of the indentured people across the plantation colonies in Fiji and in the Caribbean

The story of indenture is the story of betrayal of trauma and of resistance It is also a narrative of resilience assimilation and acculturation This book offers an in depth literary study to reveal that there exists a language of indenture one that permeates all the texts written on the subject The texts speak to and for each other thereby revealing the indenture experience to the reader

The Event in Science, History, Philosophy and Art Yeshayahu Ben-Aharon, 2011-10 In this book Dr Ben Aharon demonstrates how the transformation of human consciousness in modern times is expressed in the fields of Science History Philosophy and Art He shows how creative concepts have been discovered and applied in physics biology genetics and artificial intelligence In the Philosophy chapter Ben Aharon traces the thought of Deleuze and Guattari Foucault Derrida Badiou and Levinas and shows that this radical thinking is no longer abstract theoretical reasoning or mere speculation Rather it is an exercise in generating real cognitive and moral substance taking the human beyond the traditional boundaries of body subjectivity and identity The chapter on Art demonstrates how contemporary artistic work joins together with science and thinking to create a new stream of real becoming and evolution The historical decision of our time is then Are we going to apply this new creativity in social life or will we reverse it into its destructive opposite
