Affect and Belonging in Political Uses of the Past David Farrell-Banks, 2022-09-29 Affect and Belonging in Political Uses of the Past examines key political events of the past decade to analyse the relationship between the representation of certain pasts in official heritage settings and the use of the same pasts in political discourse. Drawing on data gathered from museums, heritage sites, news articles, political speeches, manifestos and through digital media such as Twitter, Farrell Banks demonstrates how a connection with a shared past can move people emotionally and give them the confidence to engage in political action. The book considers how heritage and the past moves in time and space, examining how it shapes political beliefs and action in the present. The work is a timely intervention calling attention to the political responsibilities that come with heritage work when these same languages of heritage are adopted to promote a politics of division. Introducing the concept of the moving moment, a framework by which to research and understand uses of the past, the book demonstrates how the past becomes a potent political tool. Combining critical heritage studies, critical discourse, memory studies and political theory, the book demonstrates new approaches to interdisciplinary studies within heritage. Affect and Belonging in Political Uses of the Past will thus be essential reading for academics and students engaged in the study of heritage, memory, politics, history and media.

Leiter, 2018-06-28 John Locke whose ideas helped give birth to the United States predicated his political theory on the Hebrew Bible Why **Reification and Representation** Graham Cairns, 2018-08-15 The relationship between politics and the public relations industry is controversial and at times polemic However one component of this relationship that has yet to be investigated is the role of architecture Arguing for a fundamental reconfiguration of our understanding of political architecture this book suggests it is not only a question of constructed buildings but equally a case of mediated imagery Considered through examples of architecture as a backdrop for photo shoots by politicians in the democracies of the United States and the United Kingdom this book suggests these images give us both a better understanding of recent developments in the Western political economy and the architectural and urban developments of the late 20th and early 21st Centuries Using case studies of Margaret Thatcher Tony Blair David Cameron Barack Obama George W Bush and Donald Trump this book represents a ground-breaking triangular analysis that will be essential reading for scholars in architecture politics media and communication studies **The Rough Guide to Europe On A Budget** Rough Guides, 2010-05-01 The Rough Guide to Europe on a Budget is the ultimate guide to exploring this fascinating continent on a shoestring with coverage of all the top sights the clearest mapping of any guide and handy hints on how to save money Discover the highlights of Europe from the vibrant capitals of London Paris and Rome to the great outdoors whether skiing in the Alps hiking in the Tatras or surfing on the Portuguese coast Read about Europe's great attractions from the Sistine Chapel in Rome to the Aya Sofia in Istanbul And with coverage of four new countries Montenegro Albania Macedonia and Bosnia Hercegovina The Rough Guide to Europe on a Budget is more comprehensive than ever before Find practical advice on travelling around Europe whether by InterRail Eurail or bus and what to see and do in each country With up-to-date descriptions of the best hostels and budget hotels in Europe bars in Europe cafés cheap restaurants and European shopping and festivals this guide is the budget-conscious traveller's must-have item for European trips **England's Cathedrals by Train** Murray Naylor, 2013-10-02 One of the jewels in the nation's crown is its Anglican cathedrals Many constructed after the invasion of 1066 stand as monuments to the determination and commitment of their Norman builders Others have been built in later centuries while some started life as parish churches and were subsequently raised to cathedral status Places of wonder and beauty they symbolize the Christian

life of the nation and are more visited today than ever as places which represent England's religious creed heritage and the skills of their builders Eight hundred years later came the Victorians who pioneered the Industrial Revolution and created railways Like their Norman predecessors they built to last and the railway system bequeathed to later generations has endured in much the same form as when originally constructed There is little sign that railways will be displaced by other modes of transport anyway in the foreseeable future Combining a study of thirty three English cathedrals and the railway systems which allow them to be reached the author seeks to celebrate these two magnificent institutions In the process he hopes to encourage others to travel the same journeys as he himself has undertaken As seen in The Church Times and Worcester News
