Magnetohydrodynamics MHD concerns the interaction between magnetic fields and conducting fluids We are concerned here with macroscopic inter actions and when the conducting fluid is a plasma time scales are very much longer than the plasma period Plasma periods vary widely but are short say 10 second We prefer the term Magneto F i Z i Dynamics MFD because the disci pline concerns mostly plasmas various liquid conductors and the liquid part of the Earth s core It seems that the only applications of MFD to water are the induction of electric currents in the oceans by the Earth s magnetic field and ship propulsion But even MFD is not quite appropriate because that term also includes solid conductors that move in magnetic fields This book is meant for graduate and upper division undergraduate stu dents in Physics Geophysics and Astrophysics as well as for practicing sci entists in these fields This book is no more than a brief introduction to MFD because this vast subject is closely related to many others namely Astrophysics Elec trodynamics Fluid Dynamics Geophysics Oceanography Plasma Physics Thermonuclear Fusion etc We sketch the fundamentals and provide many Examples as well as Case Studies related to natural phenomena MFD sorely needs a rethink it must of course be totally compatible with Physics On the contrary it is the custom to discuss the shapes of imaginary magnetic field lines without ever referring to the required electric currents **Magnetohydrodynamics with Hydrodynamics** Peter C. Magnetohydrodynamics with Hydrodynamics Volume 1 details various concepts in magnetohydrodynamics as it relates to hydrodynamics The title first covers the methods and techniques appropriate to an elementary discussion of magnetohydrodynamics and then proceeds to tackling the fundamental results of fluid dynamics Next the selection discusses the electromagnetic effects along with the motion of a fluid in a uniform magnetic field In the last chapter the text talks about steady states and equilibrium configuration The book will be of great interest to students researchers and practitioners of physics and engineering **Magneto-fluid-dynamics** Organisation du traité de l'Atlantique nord.
