Main Currents in Sociological Thought Raymond Aron, 1999 In this second volume of *Main Currents of Sociological Thought* Raymond Aron continues the analysis begun in the first volume of the great doctrines of historical sociology Aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century Emile Durkheim the great French theorist of consensus who continued Auguste Comte's quest for a science of society and a scientific validation of morality Vilfredo Pareto the Italian neo Machiavellian who mocked traditional morality and humanitarian pretensions and emphasized the oligarchic or elitist character of all societies and the German sociologist Max Weber who reflected continuously on the relationship between science and action filled with deep foreboding about the prospects for human freedom in an age marked by bureaucratization and rationalization Aron presents rich portraits of these three thinkers drawing from them what remains of enduring worth even as he distances himself from Durkheim's project for a science of society Pareto's exaggerated critique of humanitarianism and Weber's tragic pessimism Aron's book is essential for clarifying his profound indebtedness to and crucial divergences from the thought of Max Weber the sociologist par excellence in Aron's view Together with volume 1 which treats the work of Montesquieu Comte Marx and Tocqueville it forms the definitive survey of the great social thinkers to date Yet as Daniel J Mahoney and Brian C Anderson explain in their introduction *Main Currents* is more than a survey it is above all a challenge to contemporary social science to retain the ambition of an older philosophically informed sociology to present an interpretation of modern society and to reflect on the meaning of universal history

approvingly in the early chapters of *Economy and Society* Glynn Cochrane concludes that Weber's model was unlikely to include military material after the Versailles peace negotiations in which Weber participated outlawed the Prussian General Staff in 1919

Sociological Thought M. Francis Abraham, John Henry Morgan, 1989 Designed as a first line introductory text to the study of sociological thought this book is now considered a classic in the field and is a top seller in the Third World for university courses in sociological theory The perspective is cross cultural The main currents of sociological thought says the authors advanced by the founders and the later masters represent different times various cultural contexts and the many intellectual cross current representatives of each's time period Rigorously defined and not necessarily appropriately these early thoughts were merely ideas rather than soundly constructed theories for building blocks of theoretical development They provide insights into and perspectives on the structure and functioning of social systems and the conceptual frameworks for their systematic analysis The history of sociology then is the history of social thought This volume provides a carefully constructed look into the emerging social thought of the twentieth century as reflected in the emerging discipline of sociology

Nietzsche and Sociology Anas Karzai, 2019-04-18 Nietzsche and Sociology Prophet of Affirmation is about Friedrich Nietzsche's sociological reading of modern industrial society Nietzsche is often identified as a philosopher but his uniquely sociological theories and ideas have been disregarded and unacknowledged in the social sciences This work examines the reasons why Nietzsche has been ignored in sociological literature despite the evidence that most classical and modern sociological thinkers have been profoundly influenced by him This book argues that

the discipline of sociology would benefit by seriously considering the sociological elements in Nietzsche's prolific work as a way of reevaluating not only the tradition of sociology but also the sociology of tradition. His major contributions on rethinking traditional sociological theories and concepts in terms of their moral origins make it impossible for the social sciences to continue overlooking Nietzsche as a critical sociological thinker. His conception of non-economic power has become progressively more salient. Given the current juncture of humanity on the brink, Nietzsche's affirmative philosophy of life is a breath of fresh air. He remains an intellectual force to be reckoned with and may just be the remedy to our present civilizational malaise.

Is Rational Choice Theory All of Social Science? Mark I. Lichbach, 2009-12-11 A timely examination of the current paradigm wars in political science.

Theory Beyond Structure and Agency Jean-Sébastien Guy, 2019-09-10 This book offers a solution for the problem of structure and agency in sociological theory by developing a new pair of fundamental concepts: metric and nonmetric. Nonmetric forms arising in a crowd made out of innumerable individuals correspond to social groups that divide the many individuals in the crowd into insiders and outsiders. Metric forms correspond to congested zones like traffic jams on a highway: individuals are constantly entering and leaving these zones so that they continue to exist even though the individuals passing through them change. Building from these concepts, we can understand agency as a requirement for group identity and group membership, thus associating it with nonmetric forms and structure as a building-up effect following the accumulation of metric forms. This reveals the contradiction between structure and agency to be a case of forced perspective, leaving us victim to an optical illusion.
