Main Street Ready-Made Arnold R. Alanen, Joseph A. Eden, 2014-05-28 The dream of the suburb is an old one in America For more than a century city dwellers have sought to escape the crowding and pollution of industrial centers for the quiet streets and green spaces on their fringes In the 1930s that dream inspired the largest migration of Americans in the twentieth century and led to the creation of Greendale Wisconsin one of three planned communities initially begun to resettle the rural poor hit hard by the Great Depression This idea though quickly developed into a plan to revitalize cities and stabilize farming communities around the nation The result was three greenbelt towns built from scratch expressly for working class families and within easy commuting distance of urban employment Greendale completed in 1938 was consciously designed as a midwestern town in both its physical character and social organization where ordinary citizens could live in a safe attractive economical community that was in harmony with the surrounding farmland *Main Street Ready Made* examines Greendale as an outgrowth of public policy an experiment in social engineering and an organic community that eventually evolved to embrace a huge shopping mall condominiums and expensive homes while still preserving much of the architecture and ambiance of the original village A snapshot of 1930s idealism and ingenuity *Main Street Ready Made* makes a significant contribution to the history of cities suburbs and social planning in mid century America

Greenbelt, Maryland Cathy D. Knepper, 2001 Built in the 1930s on worn out tobacco land between Baltimore and Washington D C the planned community of Greenbelt Maryland was designed to provide homes for low income families as well as jobs for its builders In keeping with the spirit of the New Deal the physical design of the town contributed to cooperation among its residents and the government further encouraged cooperation by helping residents form business cooperatives and social organizations In *Greenbelt Maryland* Cathy D Knepper offers the first comprehensive look at this important social experiment Knepper describes the origins of Greenbelt the ideology of its founders and their struggle to create a cooperative planned community in the capitalist United States She tells how the town saved at one point by the intervention of Eleanor Roosevelt struggled through the McCarthy years when it was branded socialistic and even communistic In conclusion she provides a timely analysis of those qualities that not only helped the town survive but also served as the model for currents in urban development that have once again come into vogue in such movements as the new urbanism and traditional neighborhood development

American Community Mark S. Ferrara, 2020 *American Community* takes us inside forty of our nation s most interesting experiments in collective living from the colonial era to the present day By shining a light on these forgotten histories it shows that far from being foreign concepts communitarianism and socialism have always been vital parts of the American experience

Atlantic Crossings Daniel T. Rodgers, 2000-05-19 *Atlantic Crossings* is the first major account of the vibrant international network that early American reformers progressives and later New Dealers constructed often obscured by notions of American exceptionalism and of its profound impact on the United States from the 1870s through

1945 **The Handbook of Social Policy** James Midgley, Michelle Livermore, 2009 The Handbook of Social Policy is a comprehensive examination of the development implementation and impact of social policy The contributors document the substantial body of knowledge about government social policies and their driving forces *Pioneers of American Landscape Design* Charles A. Birnbaum, Lisa E. Crowder, 1993 Contesting the Postwar City Eric Fure-Slocum, 2013-06-28 Focusing on mid century Milwaukee Eric Fure Slocum charts the remaking of political culture in the industrial city Professor Fure Slocum shows how two contending visions of the 1940s city working class politics and growth politics fit together uneasily and were transformed amid a series of social and policy clashes Contests that pitted the principles of democratic access and distribution against efficiency and productivity included the hard fought politics of housing and redevelopment controversies over petty gambling questions about the role of organized labor in urban life and battles over municipal fiscal policy and autonomy These episodes occurred during a time of rapid change in the city s working class as African American workers arrived to seek jobs women temporarily advanced in workplaces and labor unions grew At the same time businesses and property owners sought to re establish legitimacy in the changing landscape This study examines these local conflicts showing how they forged the postwar city and laid a foundation for the neoliberal city **The Mutual Housing Experiment** Kristin M Szylyan, 2015-06-12 In the series Urban Life Landscape and Policy edited by Zane L Miller David Stradling and Larry Bennett Paradise Planned Robert A.M. Stern, David Fishman, Jacob Tilove, 2013-12-03 Paradise Planned is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature Paradise Planned is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape *WPA Posters in an Aesthetic, Social, and Political Context* Cory Pillen, 2020-03-09 This book examines posters produced by the Works Progress Administration WPA a federal relief program designed to create jobs in the United States during the Great Depression Cory Pillen focuses on several issues addressed repeatedly in the roughly 2 200 extant WPA posters created between 1935 and 1943 recreation and leisure conservation health and disease and public housing As the book shows the posters promote specific forms of knowledge and literacy as solutions to contemporary social concerns The varied issues these works engage and the ideals they endorse however would have resonated in complex ways with the posters diverse viewing public working both for and against the rhetoric of consensus employed by New Deal agencies in defining and managing the relationship between self and society in modern

America This book will be of interest to scholars in design history art history and American studies **The Making of Urban America** Raymond A. Mohl, Roger Biles, 2023-10-03 The revised and updated third edition of The Making of Urban America includes seven new articles and a richly detailed historiographical essay that discusses the vast urban history literature added to the canon since the publication of the second edition The authors extensively revised introductions and the fifteen reprinted articles trace urban development from the preindustrial city to the twentieth century city With emphasis on the social economic political commercial and cultural aspects of urban history these essays illustrate the growth and change that created modern day urban life Dynamic topics such as technology immigration and ethnicity suburbanization sunbelt cities urban political history and planning and housing are examined The Making of Urban America is the only reader available that covers all of U S urban history and that also includes the most recent interpretive scholarship on the subject

People, Power, Places Sally Ann McMurry, Annmarie Adams, 2000 From workers cottages in Milwaukee s Polish community to Alaskan homesteads during the Great Depression from early American retail stores to nineteenth century prisons different types of buildings reflect the diverse responses of people to their architectural needs Through inquiry into such topics the contributors to this volume examine a variety of building forms as they assess the current state of vernacular architecture studies Because scholars in vernacular architecture have come to consider thematic questions rather than simply to look at types of structures the essays chosen for this collection address issues of how people power and places intersect They demonstrate not only the inextricable links between people and place but also show how power relationships are defined by spatial organization and how this use of space has helped define the distinction between private and public The essays examine a wide range of forms from camp meetings to trolley cottages to consider what buildings might reveal about their makers users and even interpreters One article for example will give readers a new appreciation of balloon framing in Midwest farmhouses refuting popular notions that it was a single individual s invention Another considers servants quarters in Apartheid era South Africa to explore the relationship between black domestic workers and their white employers Drawn from the Vernacular Architecture Forum conferences of 1996 and 1997 these thirteen essays make significant contributions to the study of design and building processes and the adaptation of architectural forms and spaces over time They help redefine the scope of vernacular and provide new models for better understanding the built environment The Editors Sally McMurry is professor of history at Pennsylvania State University and author of Families and Farmhouses in Nineteenth Century America Annmarie Adams is associate professor of architecture at McGill University and author of Architecture in the Family Way Doctors Houses and Women 1870 1900 **Suburban Alchemy** Nicholas Dagen Bloom, 2001 In Suburban Alchemy 1960s New Towns and the Transformation of the American Dream Nicholas Dagen Bloom examines the new town movement of the 1960s which sought to transform the physical and social environments of American suburbs by showing that idealism could be profitable Bloom offers case studies of three of the movement s more famous examples

Reston Virginia Columbia Maryland and Irvine California to flesh out his historical account In each case innovative planners mixed land uses and housing types refined architectural graphic and landscape design offered well defined village and town centers and pioneered institutional planning As Bloom demonstrates these efforts did not uniformly succeed and attempts to reshape community life through design notably faltered However despite frequent disappointments and compromises the residents have kept the new town ideals alive for over four decades and produced a vital form of suburban community that is far more complicated and interesting than the early vision promoted by the town planners Lively chapters illustrate efforts in local politics civic spirit social and racial integration feminist innovations and cultural sponsorship Suburban Alchemy should be of interest to scholars of U S urban history planning history and community development as well as the general reader interested in the development of alternative communities in the United States

The City: Land use, structure, and change in the Western city Michael Pacione, 2002 **Company Towns in the Americas** Oliver Jürgen Dinius, Angela Vergara, 2011-01-01 Company towns were the spatial manifestation of a social ideology and an economic rationale The contributors to this volume show how national politics social protest and local culture transformed those founding ideologies by examining the histories of company towns in six countries Argentina Firmat Brazil Volta Redonda Santos Fordl ndia Canada Sudbury Chile El Salvador Mexico Santa Rosa R o Blanco and the United States Anaconda Kellogg and Sunflower City Company towns across the Americas played similar economic and social roles They advanced the frontiers of industrial capitalism and became powerful symbols of modernity They expanded national economies by supporting extractive industries on thinly settled frontiers and as a result brought more land natural resources and people under the control of corporations U S multinational companies exported ideas about work discipline race and gender to Latin America as they established company towns there to extend their economic reach Employers indeed shaped social relations in these company towns through education welfare and leisure programs but these essays also show how working class communities reshaped these programs to serve their needs The editors introduction and a theoretical essay by labor geographer Andrew Herod provide the context for the case studies and illuminate how the company town serves as a window into both the comparative and transnational histories of labor under industrial capitalism *Wright on Exhibit* Kathryn Smith, 2022-07-12 The first history of Frank Lloyd Wright s exhibitions of his own work a practice central to his career More than one hundred exhibitions of Frank Lloyd Wright s work were mounted between 1894 and his death in 1959 Wright organized the majority of these exhibitions himself and viewed them as crucial to his self presentation as his extensive writings He used them to promote his designs appeal to new viewers and persuade his detractors Wright on Exhibit presents the first history of this neglected aspect of the architect s influential career Drawing extensively from Wright s unpublished correspondence Kathryn Smith challenges the preconceived notion of Wright as a self promoter who displayed his work in search of money clients and fame She shows how he was an artist architect projecting an avant garde program an innovator who expanded the palette of

installation design as technology evolved and a social activist driven to revolutionize society through design While Wright's earliest exhibitions were largely for other architects by the 1930s he was creating public installations intended to inspire debate and change public perceptions about architecture The nature of his exhibitions expanded with the times beyond models drawings and photographs to include more immersive tools such as slides film and even a full scale structure built especially for his 1953 retrospective at the Guggenheim Museum Placing Wright's exhibitions side by side with his writings Smith shows how integral these exhibitions were to his vision and sheds light on the broader discourse concerning architecture and modernism during the first half of the twentieth century Wright on Exhibit features color renderings photos and plans as well as a checklist of exhibitions and an illustrated catalog of extant and lost models made under Wright's supervision *Labor's Cold War* Shelton Stromquist,2008 How the Cold War affected local level union politics

Wisconsin Robert Carrington Nesbit,2004 Robert Nesbit's classic single volume history of Wisconsin was expanded by Wisconsin State Historian William F Thompson to include the period from 1940 to the late 1980s along with updated bibliographies and appendices First paperback edition **An Ordinary City** Justin B. Hollander,2017-08-08 This book paints an intimate portrait of an overlooked kind of city that neither grows nor declines drastically In fact New Bedford Massachusetts represents an entire category of cities that escape mainstream urban studies more customary attention to global cities New York booming cities Atlanta and shrinking cities Flint New Bedford style ordinary cities are none of these they neither grow nor decline drastically but in their inconspicuousness they account for a vast majority of all cities Given the complexities of growth and decline both temporarily and spatially how does a city manage change and physically adapt to growth and decline This book offers an answer through a detailed analysis of the politics environment planning strategies and history of New Bedford *Planning the Twentieth-century American City* Mary Corbin Sies,Christopher Silver,1996 Arguing that planning in practice is far more complicated than historians usually depict the authors examine closely the everyday social political economic ideological bureaucratic and environmental contexts in which planning has occurred In so doing they redefine the nature of planning practice expanding the range of actors and actions that we understand to have shaped urban development
