Reconciliation in Selected Shakespearean Dramas Beatrice Batson, 2021-02-03 This study focuses on the rich complexity of the term reconciliation as depicted by Shakespeare in selected dramas The study declares the term's biblical and theological basis and asserts that it is also a prominent word in social and political discourse

Some contributors to this volume connect reconciliation to justification and atonement before God through Christ's death others see the interrelations between the state and the religious character of its ruler others unfold the need for reconciliation between one person and another or one group of persons and another while other contributors include the thematic narrative significance of the term The Making of Strategy Williamson Murray,1996-05-31 Most writing about strategy has focused on individual strategic theorists or great military leaders This book focuses instead on the messy processes by which rulers and states have framed strategy in the past a subject of vital practical importance to strategists and of great interest to students of strategy and statecraft It consists of 17 case studies that range from fifth century Athens and Ming China to Hitler's Germany Israel and the post 1945 United States The studies analyse within a common interpretive framework precisely how rulers and states have made strategy The introduction emphasises the constants in the rapidly shifting world of the strategist the concluding essay tries to understand the forces that have driven the transformation of strategy since 400 BC and seem likely to continue to transform it in the future **German and Austrian-German**

Political Economy, Linguistics and Culture Jürgen Backhaus,2007-12-21 During the late 19th and throughout the 20th

century social sciences in general and economics in particular have undergone enormous progress This has led to something of an embarrassment of riches While certain topics have been fully researched to the point where the marginal benefit from further research is approaching zero others have remained largely under researched or were being ignored altogether It is this discrepancy which prompted the research paradigm of Crossing Bridges For this volume ten authors have joined forces to address the problem of under researched topics focussing in particular on gaps in interdisciplinary research between economics and other social sciences such as linguistics art and cultural history Making use of interdisciplinary methods and approaches the book makes a case for stronger bonds between the different fields of social science
