Mainstreaming Men Into Gender And Development Debates Reflections And Experiences:

Mainstreaming Men Into Gender and Development Sylvia H. Chant, Matthew C. Gutmann, 2000 Based on research commissioned by the World Bank this book's primary focus is on incorporating men in gender and development interventions at the grass roots level. It draws attention to some of the key problems that have arisen from male exclusion as well as to the potential benefits of and obstacles to men's inclusion.

Mainstreaming Gender in Development Fenella Porter, Caroline Sweetman, 2005 Articles discuss how gender mainstreaming has been understood in different organisations provide examples of good work which supports the empowerment of women and look beyond gender mainstreaming to what new possibilities exist for transformation.

Handbook of Studies on Men and Masculinities Michael S. Kimmel, Jeff Hearn, Raewyn Connell, 2005 In the past research in the field of gender has mainly addressed issues about women and has for the most part been developed by women. Recently the study of gender has rapidly expanded and there has been a growing interest in men's and boys' identities, conduct and problems. The *Handbook of Studies on Men and Masculinities* is an interdisciplinary and international culmination of the growth of men's studies that also offers insight about future directions for the field. The Handbook provides a broad view of masculinities primarily across the social sciences with the inclusion of important debates in some areas of the humanities and natural sciences. The various approaches presented in this Handbook range across different disciplines, theoretical perspectives, methodologies and conceptualizations in relation to the topic of men. Editors Michael S. Kimmel, Jeff Hearn and Robert W. Connell have assembled an esteemed group of contributors who are among the best known experts in their particular fields. The *Handbook of Studies on Men and Masculinities* examines the construction of masculinities in four different frames: the social organization of masculinities in their global and regional iterations; the institutional reproduction and articulation of masculinities; the ways in which masculinities are organized and practiced within a context of gender relations; and the ways in which individual men express and understand their gendered identities. The Handbook is organized in a way that moves from the larger global and institutional articulations of masculinities to the more intimate and personal expressions. The *Handbook of Studies on Men and Masculinities* provides scholars, researchers and students with the most current incisive scholarship available for the men's studies area of gender studies. It is a vital resource for those interested in the practical or cultural issues about men, boys and gender as well as an excellent addition to any academic library.

Masculinities Matter! Frances Cleaver, 2002-11 Men appear to be missing from much gender and development policy but many emerging critiques suggest the need to pay more attention to understanding men and masculinities and to analyzing the social relationships between men and women. This book considers the case for a focus on men in gender and development which requires us to reconsider some of the theories and concepts which underlie policies. It includes arguments based on equality and social justice, the specific gendered vulnerabilities of men, the emergence of a crisis

of masculinity and the need to include men in development as partners for strategic change

Violence at the Urban Margins Javier Auyero, Philippe I. Bourgois, Nancy Scheper-Hughes, 2015 In the Americas debates around issues of citizen's public safety from debates that erupt after highly publicized events such as the shootings of Jordan Davis and Trayvon Martin to those that recurrently dominate the airwaves in Latin America are dominated by members of the middle and upper middle classes However a cursory count of the victims of urban violence in the Americas reveals that the people suffering the most from violence live and die at the lowest of the socio symbolic order at the margins of urban societies The inhabitants of the urban margins are hardly ever heard in discussions about public safety They live in danger but the discourse about violence and risk belongs to is manufactured and manipulated by others others who are prone to view violence at the urban margins as evidence of a cultural or racial defect rather than question violence's relationship to economic and political marginalization As a result the experience of interpersonal violence among the urban poor becomes something unspeakable and the everyday fear and trauma lived in relegated territories is constantly muted and denied This edited volume seeks to counteract this pernicious tendency by putting under the ethnographic microscope and making public the way in which violence is lived and acted upon in the urban peripheries It features cutting edge ethnographic research on the role of violence in the lives of the urban poor in South Central and North America and sheds light on the suffering that violence produces and perpetuates as well as the individual and collective responses that violence generates among those living at the urban margins of the Americas **Mainstreaming Politics** Carol Lee Bacchi, Carol Bacchi, Joan Eveline, 2010 This book offers an innovative rethinking of policy approaches to gender equality and of the process of social change It brings several new chapters together with a series of previously published articles to reflect on these topics A particular focus is gender mainstreaming a relatively recent development in equality policy in many

industrialised and some industrialising countries as well as in large international organisations such as the World Bank the International Monetary Fund and the International Labour Organization The book draws upon poststructuralist organisation and policy theory to argue that it is impossible to script reform initiatives such as gender mainstreaming As an alternative it recommends thinking about such policy developments as fields of contestation shaped by on the ground political deliberations and practices including the discursive practices that produce specific ways of understanding the problem of gender inequality In addition to the new chapters the editors Bacchi and Eveline produce brief introductions for each chapter tracing the development of their ideas over four years Through these commentaries the book provides exciting insights into the complex processes of collaboration and theory generation Mainstreaming Politics is a rich resource for both practitioners in the field and for theorists In particular it will appeal to those interested in public policy public administration organisation studies sociology comparative politics and international studies

Out of the Shadows Patricia Fernández-Kelly, Jon Shefner, 2010-11 Since the beginning of scholarly writing about the informal economy in the mid 1970s the debate has evolved from addressing survival strategies of the poor to considering the implications for national development and the global economy Simultaneously research on informal politics has ranged from neighborhood clientelism to contentious social movements basing their claims on a variety of social identities in their quest for social justice Despite related empirical and theoretical concerns these research traditions have seldom engaged in dialogue with one another Out of the Shadows brings leading scholars of the informal economy and informal politics together to address how globalization has influenced local efforts to resolve political and economic needs and how these seemingly separate issues are indeed deeply related In addition to the editors contributors are Javier Auyero Miguel Angel Centeno Sylvia Chant Robert Gay Mercedes Gonz lez de la Rocha Jos Itzigsohn Alejandro Portes and Juan Manuel Ramirez
