Containing the proceedings of the 14th Conference on Studies Repairs and Maintenance of Heritage Architecture STREMAH 2015, this book provides the necessary scientific knowledge required to formulate regulatory policies and to ensure effective ways of preserving the architectural heritage. First held in 1989, the STREMAH conference attracts an extensive range of quality contributions from scientists, architects, engineers and restoration experts from all over the world dealing with various aspects of heritage buildings. The conference proceedings cover a wide range of topics related to the historical aspects and the reuse of heritage buildings as well as technical issues on the structural integrity of different types of buildings such as those constructed with materials as varied as iron and steel, concrete, masonry, wood or earth. Material characterisation techniques are also addressed including non-destructive tests via computer simulation. Other topics include Surveying and monitoring, Performance and maintenance, Modern 19th/20th century heritage, Maritime heritage, Simulation and modelling, Material characterisation, New technologies or materials, Corrosion and material decay, Seismic vulnerability, Assessment and re-use of heritage buildings, Heritage and tourism, Social and economic aspects in heritage, Guidelines, codes and regulations for heritage, Heritage management, Defence heritage, Industrial heritage, Transportation heritage. **Building Materials and Structures Report** United States. National Bureau of Standards, 1956 *Building Construction* Bhavikatti S.S., Building Construction covers the entire process of building construction in detail from the stage of planning and foundation building to the finishing stages like plastering, painting, electricity supply and woodwork. Each of the basic components of a building are covered separately including doors, windows, floors, roof, walls, partitions as are the basic finishing works like plumbing, damp proofing, ventilation, air conditioning and so on. Essential features of construction like acoustics, fire resistance and earthquake resistant design are also covered. In keeping with contemporary needs, the book also includes a chapter on the environmental impact of a building and how to make it green. The text presented in simple, precise and reader-friendly language is amply supported by figures and tables. Together with its companion volume Building Materials, the book will meet the academic requirements of degree as well as diploma courses in civil engineering and architecture.
