Architectures for the Intelligent AI-Ready Enterprise Boris Bialek,Sebastian Rojas Arbulu,Taylor Hedgecock,2025-09-05 Create AI ready enterprise solutions with MongoDB and discover how to design intelligent architectures that transform data into innovation efficiency and real business value Key Features Complete guide covering GenAI to agentic AI semantic protection to multi agent systems 25 proven AI use cases delivering measurable impact across 6 industries 15 real enterprise case studies from Novo Nordisk Base 39 and more Purchase of the print or Kindle book includes a free PDF eBook Book DescriptionAI is reshaping industries yet most organizations struggle to scale beyond pilots Architectures for the Intelligent AI Ready Enterprise bridges this gap with practical frameworks for building AI ready architectures that deliver lasting business value The book helps you explore System of Action databases and see why they re revolutionizing real time decision making

Through real world applications across industries from manufacturing and healthcare to financial services and retail you ll discover how leading organizations transform their operations You ll learn semantic data protection techniques that enable AI in regulated industries as well as master advanced patterns including agentic AI and multi agent orchestration Written by MongoDB and industry practitioners this book combines strategy with technical depth and proven business value You ll modernize by enabling AI innovation while preserving existing investments implement trustworthy AI with governance frameworks and build scalable solutions using a unified data platform like MongoDB that delivers measurable ROI and transformation Whether you re architecting next generation systems or modernizing legacy infrastructure this book provides the patterns case studies and expert guidance to build enterprises that ll thrive in an intelligent future What you will learn Design AI ready data architectures that scale in production Define systems of action and explain why they matter for enterprises Modernize legacy systems for AI ready unified architectures Implement governance privacy and compliance frameworks for AI Explore real world AI implementations for over six industries Deploy production RAG and agentic systems with MongoDB Apply semantic data protection in regulated industries Build domain specific AI agents and intelligent copilots Apply MCP causal AI and multi agent systems for future ready architectures Who this book is for This book is for IT leaders enterprise architects solution designers and innovators ready to transform AI potential into production reality Whether you re modernizing legacy systems implementing scalable AI solutions or translating AI concepts into measurable business outcomes this book provides practical frameworks and industry proven patterns Basic familiarity with enterprise systems and data architecture is helpful but deep AI expertise isn t required *Intelligent Operation and Maintenance for Subsea Production Systems* Baoping Cai,Yiliu Liu,Yonghong Liu,Yixin Zhao,Xiaoyan Shao,2025-06-29 This book systematically explores the challenges and advancements in integrating intelligent technologies with ocean engineering with a particular focus on three core topics of fault diagnosis fault prognosis and maintenance for subsea production systems in harsh environments It specifically addresses subsea engineering focusing on the intersection with intelligent technologies in operation and maintenance and also appeals to scholars and engineers from various disciplines including Mechanical Engineering Electrical Engineering Oil and Gas Production Reliability Engineering and other related fields This book introduces the latest algorithmic models for fault diagnosis prognosis and maintenance grounded in advanced methodologies such as big data digital twin Bayesian Networks It features comprehensive figures detailed tables and a novel presentation style making complex research more accessible Additionally this book stands out for its systematic approach to integrating cutting edge methodologies with practical applications providing practical insights and demonstrating foresight in the field of intelligent operation and maintenance for subsea production systems The book is intended for graduate students researchers practitioners industry engineers and maintenance professionals specializing in subsea engineering marine technology intelligent systems oil and gas production systems and alike *Reliability and Maintainability Assessment of Industrial*

Systems Mangey Ram, Hoang Pham, 2022-05-05 This book covers advanced reliability and maintainability knowledge as applied to recent engineering problems. It highlights research in the fields of reliability measures of binary and complex engineering systems, cost analysis, simulations, optimizations, risk factors, and sensitivity analysis. The book scrutinizes various advanced tools and techniques, methodology, and concepts to solve the various engineering problems related to reliability and maintainability of the industrial system at minimum cost and maximum profit. It consists of 15 chapters and offers a platform to researchers, academicians, professionals, and scientists to enhance their knowledge and understanding of the concept of reliability in engineering.

Upgrading SAP® Maurice Sens, 2008-02-21 *Total Manufacturing Assurance* Douglas Brauer, John Cesarone, 2022-04-06 This new edition presents an enhanced perspective for the innovative concept of Total Manufacturing Assurance (TMA) and the holistic means by which such assurance can be attained. In fulfilling this objective, this textbook discusses the management and engineering techniques and tools required to achieve TMA. Using a holistic approach to manufacturing operations, Total Manufacturing Assurance: Controlling Product Quality, Reliability, and Safety, Second Edition, focuses on analytics and performance assessment along with Industry 4.0 and the role it plays in advanced manufacturing. The textbook covers strategic planning, innovation, and engineering economics, as well as the manufacturing process, materials, and operations. Product manufacturing system reliability, maintainability, availability, quality, and safety, along with financial issues in decision making and engineering analysis, are all captured in this new edition. Students at undergraduate and graduate levels studying engineering management, mechanical, industrial, and manufacturing engineering, as well as business students, will find this new edition an invaluable instructional resource. At the same time, working professionals, including management engineers and others who are intimately involved in the manufacturing system sector, will also find this textbook very useful in their day-to-day work. PowerPoint slides and a solutions manual are available to instructors for qualified course adoptions.

Industrial Engineering in the Digital Disruption Era Fethi Calisir, Orhan Korhan, 2020-03-16 This book gathers extended versions of the best papers presented at the Global Joint Conference on Industrial Engineering and Its Application Areas (GJCIE) held on September 2-3, 2019, in Gazimagusa, North Cyprus, Turkey. It covers a wide range of topics, including decision analysis, supply chain management, systems modelling, and quality control. Further special emphasis is placed on the state of the art and the challenges of digital disruption, as well as effective strategies that can be used to change organizational structures and eliminate the barriers that are keeping industries from taking full advantage of today's digital technologies.

New Technologies, Development and Application VI Isak Karabegovic, Ahmed Kovačević, Sadko Mandzuka, 2023-05-19 This book features papers focusing on the implementation of new and future technologies which were presented at the International Conference on New Technologies Development and Application held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on 22-24 June 2023. It covers a wide range of future technologies and technical disciplines, including complex systems such as Industry 4.0, patents in

industry 4 0 robotics mechatronics systems automation manufacturing cyber physical and autonomous systems sensors networks control energy and renewable energy sources automotive and biological systems vehicular networking and connected vehicles effectiveness and logistics systems smart grids nonlinear systems power social and economic systems education and IoT This book is oriented towards Fourth Industrial Revolution Industry 4 0 which implementation will improve many aspects of human life in all segments and lead to changes in business paradigms and production models Further new business methods are emerging transforming production systems transport delivery and consumption which need to be monitored and implemented by every company involved in the global market *Intelligent and Transformative Production in Pandemic Times* Chin-Yin Huang,Rob Dekkers,Shun Fung Chiu,Daniela Popescu,Luis Quezada,2023-02-02 This book contains the proceeding of the 26th International Conference on Production Research ICPR ICPR is a biennial conference that has been hosted for more than a half century It is regarded worldwide as one of the leading conferences of production research industrial engineering and related subjects The acute impact of the pandemic on human lives is spurring further research and advances because modern life relies on production and supply networks The future of production calls for transformative research exploiting the possibilities of artificial intelligence in particular to respond to the challenge of sustainability This book is of interest to researchers students and professionals in industry
