How China Sees the World John M. Friend,Bradley A. Thayer,2018 Han centrism a virulent form of Chinese nationalism asserts that the Han Chinese are superior to other peoples and have a legitimate right to advance Chinese interests at the expense of other countries Han nationalists have called for policies that will allow China to reclaim the prosperity stolen by foreign powers during the Century of Humiliation The growth of Chinese capabilities and Han centrism suggests that the United States its allies and other countries in Asia will face an increasingly assertive China and also one that thinks it possesses a right to dominate international politics John M Friend and Bradley A Thayer explore the roots of the growing Han nationalist group and the implications of Chinese hypernationalism for minorities within China and for international relations The deeply rooted chauvinism and social Darwinism underlying Han centrism along with China s rapid growth threaten the current stability of international politics making national and international competition and conflict over security more likely Western thinkers have yet to consider the adverse implications of a hypernationalistic China as opposed to the policies of a pragmatic China were it to become the world s dominant state

Colonial Legacies And Contemporary Studies Of China And Chineseness: Unlearning Binaries, Strategizing Self Prapin Manomaivibool, Zhiyu Shi, Chih-yu Shih, Mariko Tanigaki, Swaran Singh, 2020 Colonial legacies in knowledge production affect the way the world is represented and understood today However the subject is rarely attended The book *Colonial Legacies and Contemporary Studies of China and Chineseness Unlearning Binaries Strategizing Self* is about the colonial construction of intellectual perspectives of the colonized population in terms of the latter's approach to China and Chineseness in the modern world Relying on the available oral histories of senior China scholars primarily in Asia authors from various postcolonial and colonial sites present these multiple routes of self constitution and reconstitution through the use of China and Chineseness as category The revealed manipulation of this third category romantically as well as antagonistically is easier than straightforward self reflection for us all to accept that coming to identities and relations none even subaltern is politically innocent or capable of epistemological monopoly Through comparative studies it shows a way of self understanding that does not always require discursive construction of border or cultural consumption of any specific other *Korea-US-China Trilateral Relations in the Xi Jinping Era* Duck-Koo Chung, Byung-se Yun, 2024-11-15 This book represents the very first comprehensive work that examines Korea US China trilateral relations through a strategic triangular lens It moves beyond conventional discussions of bilateral ties to provide an in depth analysis of the complexity conflict and economic interdependence characterizing the relationships among these three nations This book takes a fascinating approach by delving into how Xi Jinping's personality and traits influence China's decision making and in turn affect the trilateral relationship between Korea the U S and China This angle is particularly compelling because it

personalizes international relations grounding geopolitical shifts and strategies in the individual characteristics of a key world leader By examining Xi Jinping's personal impact this book can offer insights that differ from traditional analyses focused more on economic or military metrics This unique perspective could indeed attract readers interested in understanding the nuanced ways in which individual leadership styles impact global politics *Routledge Handbook of Chinese and Eurasian International Relations* Mher Sahakyan, 2024-07-26 The Routledge Handbook of Chinese and Eurasian International Relations explores China's relations with the Eurasian continent's regions and countries in a multipolar era providing an equal and balanced platform for scholars and practitioners from East West North and South This diversity enriches the contribution giving it a dynamic ability to examine sources in different languages and cover a vast geography Divided into ten parts this handbook analyses the major powers in a Multipolar World Order China's political and economic interests in post Soviet Eurasia Middle East Europe Asia Pacific and Arctic and China's relations with the US Russia Eurasian Economic Union NATO and other players International technology and environmental experts consider the impact of the Belt and Road Initiative along with other international economic and transport corridors and examine China's multilateral relations and Digital Silk Road and e governance roles The Routledge Handbook of Chinese and Eurasian International Relations also contains official documents detailing the establishment of diplomatic relations between China and several European and Asian states making it an authoritative source on diplomatic affairs This groundbreaking book will be of interest to policymakers businessmen scholars and students of international relations area studies cybersecurity and digitalization economics and the politics of international trade security studies foreign policy global governance international organizations and environmental studies *Chinese Television and National Identity Construction* Lauren Gorfinkel, 2017-11-03 This book examines music entertainment programmes on China Central Television China's only national level television network as well as on nationally available provincial channels exploring how such programmes project a nuanced image of China's identity and position in the world It shows how the images presented primarily to domestic audiences are in step with China's party state nationalism and at the same time flexible and open to change as China's circumstances change The book contextualises identity construction in the media by examining the development of television in China and the political struggles between provincial and national television stations as well as by foregrounding the historical and contemporary role of musical culture in China's nation building project It discusses the portrayal of the majority Han Chinese and of ethnic minorities and their music which the author argues are shown as fitting with the party state rhetoric of a unitary multi ethnic state It also outlines how the Chinese of Greater China Hong Kong Taiwan Macao and the overseas Chinese are incorporated into a mainland centred Chinese identity In addition it shows how the performances of foreign personalities on the Chinese television stage emphasise foreigners attraction to China the uniqueness of the Chinese nation and Chinese civilisation and the revitalised role of China in the world Overall the book demonstrates how the

variations of Chinese identity fit with prevailing political ideologies in China and with the emerging theme of a China centred world

China and the WTO Deepak Bhattasali, Shantong Li, William J. Martin, 2004-07-09 China's accession to the WTO requires a great many specific policy reforms. However, if the best results are to be obtained, it is important that these reforms be implemented as part of a consistent development program rather than simply by treating them as a recipe. To do this, policy makers must understand the range and nature of the policy changes required by accession, their implications for the economy, and the availability and effects of supporting policies. China and the WTO analyzes the nature of the reforms involved in China's accession to the WTO, assesses their implications for the world economy, and examines the implications for individual households, particularly the poor. Its key objective is to provide the information that will allow policy makers to implement WTO commitments and formulate supporting policies to contribute strongly to economic development and poverty reduction. Individual chapters by leading scholars analyze the nature of the reforms in key areas such as agriculture, services, intellectual property, and safeguards, and anti-dumping. These chapters form the building blocks for later chapters which analyze the implications of reform for the economy. The book also includes a series of studies that assess the implications for households, taking into account the social safety net policies applying in China, and the impacts of complementary policies in areas such as labor market reform and investments in human capital. Of interest to policymakers, academics, and students studying international trade issues, and to practitioners in the area of trade and development, China and the WTO is a valuable addition to the wealth of information provided by the World Bank Trade and Development Series.
