Proceedings of the Second Pan American Scientific Congress: (section I) Anthropology. W. H. Holmes, chairman ,1917 **The Mystical Science of the Soul** Jessica A. Boon,2012-01-01 Ultimately I propose that considering internalization as embodiment is a critical methodological shift in understanding mystical methods in general and especially for probing recollection mysticism in depth The inner man as opposed to the outer man is a Pauline and Lutheran commonplace that is too frequently taken out of context leading historians of the Renaissance in general and of Spanish Renaissance religion in particular to value references to internal or mental methods of spirituality as an improvement over external or bodily rituals This book takes its cue from the recent cognitive turn in medieval studies that complicates studies of the body in religion by focusing on the embodied aspects of cognition claiming a continuum between body and soul rather than a hierarchy I argue that medieval theories of cognition made the divorce of the body from the soul impossible for a Galenic doctor even one who spoke of the body and the world with contempt and by implication impossible for his Castilian audience Without serious consideration of Laredo's reliance on an embodied soul rather than on a body soul dualism therefore no proper assessment of the unitive stage of reconocimiento can be made Introduction p 6 7 **Sceptres and Sciences in the Spains** Ruth Hill,2000-01-01 Sceptres and Sciences argues convincingly that previous research on the Hispanic Late Baroque has underweighted the ideologies of ethnicity and empire embedded in Cartesianism and French neoclassicism a masterful work of scholarship should become essential reading in the field of Colonial and Spanish Enlightenment Studies Bulletin of Hispanic Studies **Proceedings of the Second Pan American Scientific Congress: (section IX) Transportation, commerce, finance and taxation. of the vital fact of life which comprises not only the works and enjoyment of the mind and the spirit but those of the bios and the cosmos too The full fledged dialogue with the hard core sciences opens up philosophy of life and the human creative condition draws together all the radiations of life into its field of inquiry Tymieniecka thus proposes a new mathesis universalis the dream of Leibniz and Husserl which can at least be fulfilled
