Number Sense Routines Jessica F. Shumway, 2018 Upper elementary teachers have a big job to help students deepen their mathematical understanding and become more efficient mathematicians **Number Sense Routines Developing Mathematical Understanding Every Day in Grades 3-5** is about tapping into every child's innate number sense and providing daily connected experiences that are responsive to children's learning needs Through familiar five ten or fifteen minute warm up routines author Jessica Shumway offers both beginner and veteran teachers easy and effective ways to build and solidify students number sense foundations No matter how familiar the routine Jessica infuses each with new joy depth and life She reveals the careful thinking and planning that goes into each routine and provides detailed vignettes and dialogues of how they unfold in real classrooms She gives teachers a clear view into her nuanced facilitation Each routine becomes an exciting opportunity to understand where students are in their understanding and to help students articulate and extend their mathematical thinking Not only will these routines help develop students mathematical understanding as they move towards using standard algorithms but teachers will learn to better recognize the big ideas that emerge in discussions how to encourage important strategies based in number sense and how to facilitate discussions on key mathematical concepts

Neuroscience of Mathematical Cognitive Development Rhonda Douglas Brown, 2018-04-13 This book examines the neuroscience of mathematical cognitive development from infancy into emerging adulthood addressing both biological and environmental influences on brain development and plasticity It begins by presenting major theoretical frameworks for designing and interpreting neuroscience studies of mathematical cognitive development including developmental evolutionary theory developmental systems approaches and the triple code model of numerical processing The book includes chapters that discuss findings from studies using neuroscience research methods to examine numerical and visuospatial cognition calculation and mathematical difficulties and exceptionalities It concludes with a review of mathematical intervention programs and recommendations for future neuroscience research on mathematical cognitive development Featured neuroscience research methods include Functional Magnetic Resonance Imaging fMRI Diffusion Tensor Imaging DTI Event Related Potentials ERP Transcranial Magnetic Stimulation TMS **Neuroscience of Mathematical Cognitive Development** is an essential resource for researchers clinicians and related professionals and graduate students in child and school psychology neuroscience educational psychology neuropsychology and mathematics education
