Nunneries Learning And Spirituality In Late Medieval English Society The Dominican Priory Of Dartford:

Nunneries, Learning, and Spirituality in Late Medieval English Society Paul Lee, 2001 Study of Dartford Priory reveals the Dominican contribution to late medieval English female monastic life and English vernacular spirituality

English Benedictine nuns in exile in the seventeenth century Laurence Lux-Sterritt, 2017-03-24 This study of English Benedictine nuns is based upon a wide variety of original manuscripts including chronicles death notices clerical instructions texts of spiritual guidance but also the nuns own collections of notes It highlights the tensions between the contemplative ideal and the nuns personal experiences illustrating the tensions between theory and practice in the ideal of being dead to the world It shows how Benedictine convents were both cut off and enclosed yet very much in touch with the religious and political developments at home but also proposes a different approach to the history of nuns with a study of emotions and the senses in the cloister delving into the textual analysis of the nuns personal and communal documents to explore aspect of a lived spirituality when the body which so often hindered the spirit at times enabled spiritual experience

Learning to Die in London, 1380-1540 Amy Appleford, 2015 Taking as her focus a body of writings in poetic didactic and legal modes that circulated in England's capital between the 1380s just a generation after the Black Death and the first decade of the English reformation in the 1530s Amy Appleford offers the first full length study of the Middle English art of dying ars moriendi An educated awareness of death and mortality was a vital aspect of medieval civic culture she contends critical not only to the shaping of single lives and the management of families and households but also to the practices of cultural memory the building of institutions and the good government of the city itself In fifteenth century London in particular where an increasingly laicized reformist religiosity coexisted with an ambitious program of urban renewal cultivating a sophisticated attitude toward death was understood as essential to good living in the widest sense The virtuous ordering of self household and city rested on a proper attitude toward mortality on the part both of the ruled and of their secular and religious rulers The intricacies of keeping death constantly in mind informed not only the religious prose of the period but also literary and visual arts In London's version of the famous image text known as the Dance of Death Thomas Hoccleve's poetic collection *The Series* and the early sixteenth century prose treatises of Tudor writers Richard Whitford Thomas Lupset and Thomas More death is understood as an explicitly generative force one capable if properly managed of providing vital personal social and literary opportunities

The Culture of Medieval English Monasticism James G. Clark, 2007 Examinations of the culture artistic material musical of English monasteries in the six centuries between the Conquest and the Dissolution The cultural remains of England's abbeys and priories have always attracted scholarly attention but too often they have been studied in isolation appreciated only for their artistic codicological or intellectual features and not for the insights they offer into the patterns of life and thought the underlying norms values and mentalities of the communities of men and women which made them Indeed the distinguished monastic historian David Knowles doubted there would ever be sufficient evidence to recover

the mentality of the ordinary cloister monk These twelve essays challenge this view They exploit newly catalogued and newly discovered evidence manuscript books wall paintings and even the traces of original monastic music to recover the cultural dynamics of a cross section of male and female communities It is often claimed that over time the cultural traditions of the monasteries were suffocated by secular trends but here it is suggested that many houses remained a major cultural force even on the verge of the Reformation James G Clark is Professor of History at the University of Exeter Contributors DAVID BELL ROGER BOWERS JAMES CLARK BARRIE COLLETT MARY ERLER G R EVANS MIRIAM GILL JOAN GREATREX JULIAN HASELDINE J D NORTH ALAN PIPER AND R M THOMSON

Popular reading in English c. 1400-1600 Elisabeth Salter, 2017-10-03 This book is about reading practice and experience in late medieval and early modern England It focuses on the kinds of literatures that were more readily available to the widest spectrum of the population Four case studies from many possibilities have been selected each examining a particular type of popular literature under the headings religious moral practical and fictional A key concern of the book is how we might use particular types of evidence in order to understand more about reading practice and experience so issues of method and approach are discussed fully in the opening chapter One distinctive element of this book is that it attempts to uncover evidence for the reading practices and experiences of real rather than ideal readers using evidence that is found within the material of a book or manuscript itself or within the structure of a specific genre of literature Salter attempts to negotiate a path through a set of methodological and interpretive issues in order to arrive at a better understanding of how people may have read and what they may have read This in turn leads on to how we may interpret the evidence that manuscripts and early printed books provide for the ways that medieval and early modern people engaged with reading This book will be of interest to academics and research students who study the history of reading popular culture literacy manuscript and print culture as well as to those interested more generally in medieval and early modern society and culture

The Idea of the Castle in Medieval England Abigail Wheatley, 2004 Medieval castles have traditionally been explained as feats of military engineering and tools of feudal control but Abigail Wheatley takes a different approach looking at a range of sources usually neglected in castle studies Evidence from contemporary literature and art reveals the castle's place at the heart of medieval culture as an

architecture of ideas every bit as sophisticated as the church architecture of the period This study offers a genuinely fresh perspective Most castle scholars confine themselves to historical documents but Wheatley examines literary and artistic evidence for its influence on and response to contemporary castle architecture Sermons seals and ivory caskets local legends and Roman ruins all have their part to play What emerges is a fascinating web of cultural resonances the castle is implicated in every aspect of medieval consciousness from private religious contemplation to the creation of national mythologies This book makes a compelling case for a new interdisciplinary approach to castle studies ABIGAIL WHEATLEY studied for her PhD at York University s Centre for Medieval Studies
