Starks, 2006 This work talks about the taking in and use of food and other nourishing material by the body. Nutrition is a 3 part process: First, food or drink is consumed; Second, the body breaks down the food or drink into nutrients; Third, the nutrients travel through the bloodstream to different parts of the body where they are used as fuel and for many other purposes. To give the body proper nutrition, a person has to eat and drink enough of the foods that contain key nutrients. This new book examines new research in this field which is belatedly receiving the proper attention. Nutrigenomics and Proteomics in Health and Disease Martin Kussmann, Patrick J. Stover, 2017-03-21 Now in a revised second edition, *Nutrigenomics and Proteomics in Health and Disease* brings together the very latest science based upon nutrigenomics and proteomics in food and health. Coverage includes many important nutraceuticals and their impact on gene interaction and health.
