Encyclopedia of Medical Anthropology Carol R. Ember, Melvin Ember, 2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it

is the first reference work to describe the cultural practices relevant to health in the world's cultures and to provide an overview of important topics in medical anthropology. No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world. More than 100 experts, anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world.

Coaching Children Kelly Sumich, 2013-05-01 Coaching Children Sports science essentials is the first book in Australia specifically aimed at helping community coaches and fitness professionals design safe and effective training programs for children. As obesity rates soar and levels of physical activity decline, this timely resource provides guidance for enhancing children's engagement in sport, developing their motor skills and managing performance anxiety. It provides straightforward, research-based advice on nutrition and explains in clear terms how to tailor exercise to address children's social, physical and psychological needs. A quick find resource with application to both individual and team activities, Coaching Children presents technical information in a highly practical and reader-friendly manner. Everyday questions and answers include: At what age should children specialise in a particular sport? Do sports drinks enhance children's performance? Should children do weight training? How often should children train? Focusing on effective communication strategies with both children and their parents, each chapter includes a list of insightful, reflective questions. Coaches are encouraged to apply scientific knowledge to motivate children in all aspects of training and competing in sport.
