Nutrition Counseling Skills:

Nutrition Counseling Skills for the Nutrition Care Process Linda G. Snetselaar, 2009 Through appropriate counseling and intervention nutritionists play an important role in encouraging clients to make and maintain healthy dietary changes. *Nutrition Counseling Skills for the Nutrition Care Process Fourth Edition* provides the latest counseling theory and communication techniques for clinical and community settings within the context of the American Dietetic Association Nutrition Care Process. The Fourth Edition focuses on tailoring intervention strategies to a client's dietary needs through effective interviewing, assessment, and counseling. This revision addresses the unique needs nutrition counselors face regarding obesity, heart disease, diabetes, renal disease, hypertension, cancer, eating disorders, and pregnancy. *Nutrition Counseling Skills* Linda G. Snetselaar, 1983 Abstract: This text is designed to help nutrition counselors perform their jobs more effectively and to supplement current practices in nutrition counseling. It is intended to demonstrate effective use of interviewing skills, select and apply appropriate strategies when presented with nutrition problems, evaluate progress, achievements, and failures in both clients and counselor, and adapt counseling strategies. Basic theories in interviewing and counseling skills are discussed. The application of interviewing and counseling skills is described: 1. low-calorie eating patterns and cholesterol; 2. low-carbohydrate eating patterns; 3. low-protein eating patterns; 4. low-sodium eating patterns; 5. liberal bland diets; 6. termination and follow-up. Each chapter concludes with a list of references. A glossary and several appendices are included. *Nutrition Therapy* Bridget M. Klawitter, 2007 This practical text presents a wealth of fresh ideas and techniques for strengthening counseling skills to face real-world issues in nutrition therapy. It offers students and practitioners advice on ways to increase referrals, decrease no-shows, and overcome common barriers to effective counseling. The Third Edition also explores strategies for counseling patients with AIDS, diabetes, and other chronic diseases; for group therapy; for teaching developmental skills; and for end-of-life counseling. This edition has a new reader-friendly design and layout. New learning activities, including case studies and critical thinking exercises, encourage students to apply what they have learned to common situations in clinical practice. *Nutrition Counseling Skills for Medical Nutrition Therapy* Linda G.
