Women's Experiences with HIV/AIDS Lynellyn Long, E. M. Ankrah, 1996 HIV AIDS affects women worldwide Elderly women bear a disproportionate burden of caring for those who are afflicted with the disease while young women increasingly comprise the majority of new HIV cases Intervention programs often fail to take into account the particular situations and behaviors that make women more vulnerable than men Though policy debates increasingly include women and gender considerations funds and resources for women especially those already suffering with HIV AIDS remain inadequate Women s Experiences with HIV AIDS gives voice to the experience of individual women whose personal stories reveal the daily struggles and concerns that fill their lives but are ignored in the larger dialogues about HIV AIDS Women and men from

diverse backgrounds discuss the differences between women within and across cultures and how particular traditions and attitudes can affect the prevention of or vulnerability to HIV AIDS The authors address not only women s empirical experiences but also their personal feelings beliefs and expectations as reflected in their narratives Approaching the issue from several disciplines Women s Experiences with HIV AIDS paves the way for the empowerment of women by bringing them directly into the debates concerned with their protection against HIV AIDS This collection edited by two well known scholars in this field provides a much needed critical examination of the interventions and policies that do not yet fully address the needs and limitations of women and girls suffering with or confronting the possibility of infection

Women and AIDS Ellen Cole,Esther D Rothblum,Linda K Fuller,Nancy Roth,2014-01-14 For many women the advice Use a condom is not enough to help protect them from HIV infection As Women and AIDS reveals negotiating safer sex practices is a very complex issue for women who are involved in relationships where they do not enjoy physical social or economic equality The book s authors maintain that the key to curbing the spread of HIV and to caring for those already infected is communication Women and AIDS is the first volume to address HIV AIDS and women from a communication perspective This helpful guidebook addresses how women might achieve safer sexual and drug injection practices with partners but it also explores women s negotiation of the health care system as patients medical research subjects and caregivers It challenges traditional assumptions about the relationship between care providers and patients and the meaning of patient compliance and raises important questions about gender race and class that are exacerbated by the epidemic Designed to ground interventions in the realities of women s lives Women and AIDS discusses what women can do to get around communication and health care obstacles To this end you will learn about using the media for HIV related social action and to promote women s views of HIV and sexuality prison health care for HIV positive women cultural constructions of sex and drug sharing in a variety of communities long term changes that will empower women delivering an HIV positive diagnosis to patients gender roles and caregiving the language we use to talk about Third World women and Asian AIDS women AIDS filmmakers videographers For the benefit of AIDS activists health care providers and counselors Women and AIDS discusses women and their communication and awareness from virtually every angle This book analyzes situations where communication breaks down from the woman who can t openly

discuss safe sex with her partner to the drunk college student who hooks up to the doctor who gives an HIV positive diagnosis without compassion and offers communication solutions This will help women avoid such risks establish communication and safety in their lives and construct meaningful roles in relationship to HIV AIDS **Positive Women**

America Jeffrey Andrew Weinstock, 2004 From essays about the Salem witch trials to literary uses of ghosts by Twain Wharton and Bierce to the cinematic blockbuster The Sixth Sense this book is the first to survey the importance of ghosts and hauntings in American culture across time From the Puritans' conviction that a thousand preternatural beings appear every day before our eyes to today's resurgence of spirits in fiction and film the culture of the United States has been obsessed with ghosts In each generation these phantoms in popular culture reflect human anxieties about religion science politics and social issues Spectral America asserts that ghosts whether in oral tradition literature or such modern forms as cinema have always been constructions embedded in specific historical contexts and invoked for explicit purposes often

political in nature The essays address the role of spectral evidence during the Salem witch trials the Puritan belief in good spirits the convergence of American Spiritualism and technological development in the nineteenth century the use of the supernatural as a tool of political critique in twentieth century magic realism and the ghosting of persons living with AIDS They also discuss ghostly themes in the work of Ambrose Bierce Edith Wharton Gloria Naylor and Stephen King

AIDS Narratives Steven F. Kruger, 2013-10-28 This is the first book length study of the rich fiction that has emerged from the AIDS crisis Examining first the ways in which scientific discourse on AIDS has reflected ideologies of gender and sexuality such as the construction of AIDS as a disease of gay men part of a battle over masculinity and thus largely excluding women with AIDS from public attention the book considers how such discourses have shaped narrative understandings of AIDS On the one hand AIDS is seen as an invariably fatal weakening of an individual's bodily defenses a depiction often used to reconfirm an identification between disease and a weak and vulnerable gayness On the other hand AIDS is understood in terms of an epidemic attributable to gay immorality or unnaturalness The fiction of AIDS depends upon these two narratives with one major subgenre of AIDS novel presenting narratives of personal illness decline and death and a second focusing on epidemic spread These novels also question the narrative structures upon which they depend intervening particularly against the homophobia of those structures though also sometimes reinforcing it

Women Take Care Katie Hogan, 2018-08-06 Self sacrificing mothers and forgiving wives caretaking lesbians and vigilant maternal surrogates these good women are all familiar figures in the visual and print culture relating to AIDS In a probing critique of that culture Katie Hogan demonstrates ways in which literary and popular works use the classic image of the nurturing female to render queer AIDS more acceptable while consigning women to conventional roles and reinforcing the idea that everyone with this disease is somehow suspect In times of crisis the figure of the idealized woman who is modest and selfless has repeatedly surfaced in Western culture as a balm and a source of comfort and as a means of mediating controversial issues Drawing on examples from journalism medical discourse fiction drama film television and documentaries Hogan describes how texts on AIDS reproduce this historically entrenched paradigm of sacrifice and care a paradigm that reinforces biases about race and sexuality Hogan believes that the growing nostalgia for women's traditional roles has deflected attention away from women's own health needs Throughout her book she depicts caretaking as a fundamental human obligation but one that currently falls primarily to those members of society with the least power Only by rejecting the stereotype of the good woman she says can Americans begin to view caretaking as the responsibility of the entire society

Dancing after the Whirlwind Linda J. Tessier, 1998-11-01 Dancing after the Whirlwind explores how the denial of a sexual self affects a woman's spiritual

identity and her understanding of her place in the world L J Tessier traces the deep roots of this denial and separation of sexuality and spirituality in both Western and Eastern religions She examines the experiences of three groups of women whose sexual desires memories and experiences are routinely denied by society lesbians survivors of childhood sexual abuse and HIV positive women Drawing on their powerful examples Tessier offers us strategies for reclaiming the whirlwind of erotic power and seeing it for what it is the sacred force through which we most deeply touch one another as human beings

Helen Meekosha,Karen Soldatic,2016-01-13 Disability is of central concern to the developing world but has largely been under represented in global development debates discourses and negotiations Similarly disability studies has overlooked the theorists or the social experience of the global South and there has been a one way transfer of ideas and knowledge from the North to the South in this field This volume seeks to redress the processes of scholarly colonialism by drawing together a diverse set of understandings theorizing and experiences The chapters situate disability within the Southern context and support the work of Southern disabled scholars and activists seeking to decolonize Southern experiences knowledges and absences in the field while simultaneously attempting to make an intervention into able bodied mainstream development discourses practices and politics This book was originally published as a special issue of Third World Quarterly
