Poverty And Vulnerability In Dhaka Slums The Urban Livelihood Study:

Poverty and Vulnerability in Dhaka Slums Jane A. Pryer, 2017-03-02 Bangladesh has low levels of urbanization but a high urban population in absolute terms being one of the most densely populated countries in the world Rapid urbanization in developing countries brings numerous problems and challenges urban poverty is one important issue This important volume presents the findings of a complex and revealing multidisciplinary cohort study conducted in the slums of Dhaka Bangladesh Detailed information was assembled on material social and economic conditions livelihoods health and nutritional status Together with associated qualitative work the data forms the basis for understanding groups who are vulnerable to economic and environmental shocks and stresses and for differentiating strategies which might be adaptive in situations of hardship and scarcity The author examines many aspects of poverty and vulnerability including livelihoods work disabling illness and coping strategies the female workforce women s negotiation and well being marital instability child labour and investments in health and nutrition and utilizes the assembled material to debate on policy options

Urban Poverty and Climate Change Manoj Roy, Sally Cawood, Michaela Hordijk, David Hulme, 2016-04-20 This book deepens the understanding of the broader processes that shape and mediate the responses to climate change of poor urban households and communities in Asia Africa and Latin America Representing an important contribution to the evolution of more effective pro poor climate change policies in urban areas by local governments national governments and international organisations this book is invaluable reading to students and scholars of environment and development studies

Urban Poverty in the Global South Diana Mitlin, David Satterthwaite, 2013 This is compounded by the lack of voice and influence that low income groups have in these official spheres

Participatory Governance , Health in Megacities and Urban Areas Alexander Krämer, Mobarak Hossain Khan, Frauke Kraas, 2011-07-06 Diverse driving forces processes and actors are responsible for different trends in the development of megacities and large urban areas Under the dynamics of global change megacities are themselves changing On the one hand they are prone to increasing socio economic vulnerability due to pronounced poverty socio spatial and political fragmentation sometimes with extreme forms of segregation disparities and conflicts On the other hand megacities offer positive potential for global transformation e g minimisation of space consumption highly effective use of resources efficient disaster prevention and health care options if good strategies were developed At present in many megacities and urban areas of the developing world and the emerging economies the quality of life is eroding Most of the megacities have grown to unprecedented size and the pace of urbanisation has far exceeded the growth of the necessary infrastructure and services As a result an increasing number of urban dwellers are left without access to basic amenities like clean drinking water fresh air and safe food Additionally social inequalities lead to subsequent and significant intra urban health inequalities and unbalanced disease burdens that can trigger conflict and violence between subpopulations The guiding idea of our book lies in a multi and interdisciplinary approach to the complex topic of megacities and urban health

that can only be adequately understood when different disciplines share their knowledge and methodological tools to work together We hope that the book will allow readersto deepen their understanding of the complex dynamics of urban and megacity populations through the lens of public health geographical and other research perspectives *Scaling Urban Environmental Challenges* Peter J Marcotullio,Gordon McGranahan,2012-06-25 Think globally act locally emphasizes the importance of scale in dealing with environmental challenges but not how to factor it in This major new book focuses on the spatial dimensions of urban environmental burdens showing how important it is to take these into account when pursuing environmental justice and good governance whether in the context of the sanitary risks of slum living the pollution of uncontrolled industrialization and motorization or the enormous ecological footprints of affluent urban lifestyles Written by leading experts in the fields of urban development and environmental planning the book reviews the urban environmental shifts that have shaped todays challenges and examines conditions and problems in the urban centres of low middle and high income countries Case studies address such economically diverse cities as Accra New Delhi Mexico City and Manchester while thematic chapters explore issues including water sanitation and transportation The book concludes by exploring and analysing different scales of governance The editors argue that we should not rely solely on local governance to address local burdens like poor sanitation nor depend only on global governance for global challenges such as greenhouse gas emissions but that scale is crucial in both understanding the problems and devising successful responses Published with UNU IAS and IIED *The Under-estimation of Urban Poverty in Low and Middle-income Nations* David Satterthwaite,2004 Beyond the Resources of Poverty Sebnem Eroglu,2016-04-08 This groundbreaking volume researches the lives of gecekondu settlers in the capital city of Turkey in order to understand how households cope with poverty and why some households are more successful than others in reducing their deprivation It takes a critical stance towards existing conceptions such as household survival livelihood and coping strategy and develops an alternative model based on four types of household response to poverty income generation income allocation consumption and investment In explaining household responses and their outcomes for poverty the book demonstrates the role of different resources beyond income including social economic and cultural capital It emphasises broader structural factors such as labour market processes and state policies which influence the availability and or benefit delivery capacity of household resources and thereby moves beyond the dominant view which overemphasises the resilience of the poor Gender divisions within the household are also examined The book adopts an innovative method for measuring poverty The new method combines objective and subjective dimensions of deprivation to develop a unique way of addressing two central questions what are those standards of living whose absence indicates deprivation and how can the value of each standard of living be determined LIFE SCUFFLES OF SLUM DWELLERS A geographic Study of Gurgaon Dr. Virender Singh,2020-11-12 1 1 General Background The word slum has a slangy connotation in British society from where this word is thought to be originated In the eastern end of London this word means

room and it evolved over time to mean back slum giving the sense of back alley street of poor people Etymological Dictionary The Slum is variously named often interchangeably used in different parts of the globe viz shanty town favela rookery gecekondur skid row barrio ghetto bidonville taudis bandas de miseria barrio marginal morro loteamento barraca musseque tugurio solares mudun safi karyan medina achouaia brarek ishash galoos tanake baladi trushebi chalis katras zopadpattis bustee estero looban dagatan umjondolo watta udukku and chereka bete UN Habitat 2003 Below are some of the definitions of slum given by some eminent social scientists working in the field of slums Merriam Websters American Dictionary defines slums as a densely populated usually urban area marked by crowding dirty run down housing poverty and social disorganization whereas the Oxford Dictionary defines slums to be a squalid and overcrowded urban street or district inhabited by very poor people and it also tells that the slums consists of type of houses or buildings unfit for human habitation As per the Cambridge online dictionary a slum is a very poor and crowded area especially of a city in which the living conditions are untidy or dirty Colin s dictionary states that a slum is an area of a city where living conditions are very bad and where the houses are in bad condition and it also lists some of its synonyms like hovel ghetto shanty etc

The Routledge Handbook on Cities of the Global South Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Sustainability in South Asian Cities Subhash Anand, Rituparna Bhattacharyya, Madhushree Das, Tulshi Kumar Das, Pushkar K. Pradhan, 2025-03-03 This book explores some of the common socio economic and environmental challenges faced by the cities of South Asia which remain highly under researched South Asia comprises eight nations India Bangladesh Nepal Sri Lanka Bhutan Maldives Pakistan and Afghanistan consisting of a total population of 1.92 billion in 2022 The majority of the cities in these countries are characterized by haphazard urbanization and multi

dimensional poverty alongside its associated ingredients floods water scarcity food crises poor sanitation slums and squatter settlements and pollution among others This comprehensive book is contributed by interdisciplinary scholars and includes 25 case studies The volume brings these socio economic and environmental challenges to the fore for a better and more nuanced understanding The book help policymakers to mitigate the challenges and build sustainable cities South Asia is perhaps one of the most populous areas on the planet with nearly one third of its population with over ten cities larger than 10 million and maybe home to four of the largest cities of the world s largest ten The rights to the city and the right to breathe bread and work are as significant to South Asians The current volume is a timely addition to perhaps aiming for sustainable cities with many case studies on initiatives towards that end The canvas is vast and the coverage is daunting However the editors have a challenging task to balance out keeping the integrity of the theme in focus Professor Avaya Mohapatra Former Head and Professor now retired North Eastern Hill University Meghalaya It would be fair to say that while the fascinating scientific works inquired into by the authors through several chapters the very book is useful as a reference for readers and researchers regarding urban sustainability in South Asian developing countries including Nepal Keep up the good work Professor Vidhya Bir Singh Kansakar a veteran geographer of Nepal This book should become a companion reader for scholars and students studying sustainability It looks comprehensive admirably clear in its objectives and intellectually lively Professor Suman Singh Department of Geography Banaras Hindu University

Urban Development Challenges, Risks and Resilience in Asian Mega Cities R.B. Singh, 2014-10-16 In this book an interdisciplinary research group of faculty members researchers professionals and planners contributed to an understanding of the dynamics and dimensions of emerging challenges and risks in megacities in the rapidly changing urban environments in Asia and examined emerging resilience themes from the point of view of sustainability and public policy The world s urban population in 2009 was approximately 3.4 billion and Asia s urban population was about 1.72 billion Between 2010 and 2020 411 million people will be added to Asian cities 60 % of the growth in the world s urban population By 2020 of the world s urban population of 4.2 billion approximately 2.2 billion will be in Asia China and India will contribute 31.3 % of the total world urban population by 2025 Developing Asia s projected global share of CO₂ emissions for energy consumption will increase from 30 % in 2006 to 43 % by 2030 City regions serve as magnets for people enterprise and culture but with urbanisation the worst form of visible poverty becomes prominent The Asian region with a slum population of an estimated 505.5 million people remains host to over half of the world s slum population The book provides information on a comprehensive range of environmental threats faced by the inhabitants of megacities It also offers a wide and multidisciplinary group of case studies from rapidly growing megacities with populations of more than 5 million from developed and developing countries of Asia

Urban Poverty in Bangladesh Shahadat Hossain, 2010-11-30 The analysis of urban poverty has traditionally been dominated by economic approaches often neglecting the social questions arising from

poverty This book seeks to redress the balance and is based on both quantitative and qualitative data collected from different slums in Dhaka City Bangladesh Shahadat Hossain shows that the slum communities experience the highest level of poverty and marginality in the city They remain very much dependent on their families and social networking in their struggle to adapt to urban life This book will be invaluable for those working in the areas of urban studies development studies Asian studies sociology and social policy studies *Urban Development - Challenges and Progress* Dr.Sukanta Sarkar,2014

Climate Change 2014 - Impacts, Adaptation and Vulnerability: Global and Sectoral Aspects Christopher B. Field,Vicente R. Barros,2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy **Urban Regimes of Dispossession in the Global South** ,2025-09-25 This edited volume develops a theoretical framework what we call urban regimes of dispossession for understanding how urban actors organize dispossession and govern the urban dispossessed how the urban dispossessed arrange experience and resist dispossession and how urban dispossession contributes to creating expanding capitalist systems or transforming urban societies in the global south The book s main arguments are built on a survey of the nearly two hundred year history of global dispossession studies and solid empirical evidence from three continents Asia Africa and Latin America and seven countries Bangladesh Brazil Honduras India Lebanon Nigeria and Uganda Eighteen scholars bring diverse perspectives and realities on urban dispossession which will appeal to students scholars planners and practitioners across various social scientific disciplines including sociology anthropology urban studies political economy international relations political science economics gender studies and geography Contributors are Shapan Adnan Orlando Alves dos Santos Junior Fred Bidandi David L Brunsma Tarcyla Fidalgo Ribeiro Lakshmi Jahnavi Marie Kolling Ana Maria Kumarasamy Barbara Lipietz Lipon Mondal Adrian Murray John Nagle Victor Udemezue Onyebueke Ta sa Sanches Karen Spring Susan Spronk Luanda Vannuchi and Julian Walker *The Underbelly of the Indian Boom* Stuart Corbridge,Alpa Shah,2016-02-05 As India emerges as a major economic power producing dollar billionaires rising at the rate of 17 per year more than 800 million Indians eke out a living on less than two dollars a day This book takes the reader to the underbelly of the Indian boom an India that is not shining but is struggling to survive From the Indo Soviet Bhilai Steel Plant in Chhattisgarh where an aristocracy of labour is increasingly being replaced by a more vulnerable contract labour force we move to the banks of the Hoogly River Here Norwegian shipping companies exploit a precarious labour force that is as vulnerable to the vagaries of global finance and its crisis as the elderly especially women and wage workers who live in the slums of Chennai Also in Tamil Nadu but this time in Tiruppur we find that the garment and textile industries boom has nurtured new regimes of debt bondage among industrial workers Though public concern about the vulnerability in which poor people find themselves has resulted in new nation wide

schemes framed in the language of rights we find in Bihar and Madhya Pradesh that the practical workings of these schemes are dependent on the regional political systems in which they are enmeshed We end in the belly of the Maoist inspired Naxalite insurgency denounced by the Indian government as the country's greatest security challenge where the poor are being mobilised to rise against the injustices of the Indian state This book was originally published as a special issue of *Economy and Society* **The Routledge Handbook on Livelihoods in the Global South** Fiona Nunan, Clare

Barnes, Sukanya Krishnamurthy, 2022-05-05 The Routledge Handbook on Livelihoods in the Global South presents a unique timely comprehensive overview of livelihoods in low and middle income countries Since their widespread adoption in the 1990s livelihoods perspectives frameworks and methods have influenced diverse areas of research policy and practice The concept of livelihoods reflects the complexity of strategies and practices used by individuals households and communities to meet their needs and live their lives The Handbook brings together insights and critical analysis from diverse approaches and experiences learning from research and practice over the last 30 years The Handbook comprises an introductory section on key concepts and frameworks followed by five parts on researching livelihoods negotiating livelihoods generating livelihoods enabling livelihoods and contextualising livelihoods The introduction provides readers with an appreciation of concepts researched and applied in the five parts including chapters on vulnerability and resilience social capital and networks and institutions Each part reflects the diversity of approaches taken to understanding livelihoods whilst recognising commonalities including the centrality of power in shaping enabling and constraining livelihoods The book also reflects diversity of context including conflict climate change and religion as well as in generating livelihoods through agriculture small scale mining and pastoralism The aim of each chapter is to provide a critically informed introduction and overview of key concepts issues and debates of relevance to the topic with each chapter concluding with suggestions for further reading It will be an essential resource to students researchers and practitioners of international development and related fields Researchers and practitioners will also benefit from the book's diverse disciplinary contributions and by the wide and contemporary coverage **Urban Environments, Wealth and Health** Gordon McGranahan, 2007 **The Future of**

Asian Feminisms Nursyahbani Katjasungkana, Saskia E. Wieringa, 2011-10-18 This book on the future of Asian feminisms confronting fundamentalisms conflicts and neo liberalism is a critical contribution to the rising voices of Asian women's studies scholars and activists It is based on the ongoing research and advocacy work of the Kartini Asia Network founded in 2003 in Manila The five overlapping themes of the network are women gender studies fundamentalisms conflicts livelihood and sexuality Considering that the economic and political weight of the region is growing fast and that the 21st century has been named the Asian century Asia is increasingly recognised as the continent to which economic if not political power will shift in the coming decades The chapters brought together in this volume demonstrate the great diversity of the transversal cultural flow that women's movements within Asia provide Members of the Kartini network stimulate the articulation of a

particular Asian voice in women's studies and in the global women's movement. Considering the existing patriarchal structures all over the continent, a continuum of oppressions unfolds from the global sphere of market exchange to emerging fundamentalisms and to bitter conflicts and struggles around sexualities. The present volume provides elements for the critical dialogues that are needed between women in the region, between women and men, between people in all sorts of strategic positions and between theoreticians in the Global South and the Global North to create a world in which human dignity is not eroded by predatory economic processes and in which democracy, diversity, pluralism and inclusivity are the guiding principles of governance.
