Renewing Philosophy, 2002 **Space, Time and Culture** David Carr, Chan-Fai Cheung, 2012-11-03 Interculturality has been one of key concepts in phenomenological literature It seeks to clarify the philosophical basis for intercultural exchange within the horizon of our life world The essays in this volume focus on the themes around space time and culture from the perspectives of Chinese and Western phenomenologists Though the discussions begin with classical phenomenological texts in Husserl Heidegger or Merleau Ponty they extend to the problems of Daoism and Buddhism as well as to sociology and analytic philosophy The collection of this volume is a fruitful result of inter cultural exchange of phenomenology *An Introduction to Metaphilosophy* Søren Overgaard, Paul Gilbert, Stephen Burwood, 2013-03-07 What is philosophy How should we do it Why should we bother to These are the kinds of questions addressed by metaphilosophy the philosophical study of the nature of philosophy itself Students of philosophy today are faced with a confusing and daunting array of philosophical methods approaches and styles and also deep divisions such as the notorious rift between analytic and Continental philosophy This book takes readers through a full range of approaches analytic versus Continental scientific versus humanistic pure versus applied enabling them to locate and understand these different ways of doing philosophy Clearly and accessibly written it will stimulate reflection on philosophical practice and will be invaluable for students of philosophy and other philosophically inclined readers

Badiou and the German Tradition of Philosophy Jan Völker, 2019-02-07 The oeuvre of Alain Badiou has gained international success and recognition but most of the secondary literature focuses on internal problems of Badiou's philosophy rather than its position within a broader philosophical genealogy This book unites

philosophers from Germany Slovenia the UK Australia and France to trace the relation between elements of Badiou's philosophy and the German philosophical tradition namely the three significant movements of German Idealism Phenomenology Marxism and the Frankfurt School This is a discussion that has not yet been established although the parallels and decisive differences between poststructuralist French philosophy and German philosophy are apparent Through these paradigms Badiou's reception of German Idealism Marxism Adorno and the Critical Theory and Heideggerian phenomenology the authors shed light onto Badiou's inheritance of and engagement with these specific traditions but also highlight the links between these philosophies to open up new questions for contemporary continental thought With an original chapter from Alain Badiou himself looking back at his influences and antagonisms within the German tradition this book is essential for readers interested in the exploration of Badiou's legacy It illustrates the continuation of poststructuralist philosophy Critical Theory and the Frankfurt School assessing the place of classic continental philosophy to tackle how we might benefit from these intellectual exchanges today

Neurophilosophy of Free Will Henrik Walter, 2009-01-23 Walter applies the methodology of neurophilosophy to one of philosophy's central challenges the notion of free will Neurophilosophical conclusions are based on and consistent with scientific knowledge about the brain and its functioning Neuroscientists routinely investigate such classical philosophical topics as consciousness thought language meaning aesthetics and death According to Henrik Walter philosophers should in turn embrace the wealth of research findings and ideas provided by neuroscience In this book Walter applies the methodology of neurophilosophy to one of philosophy's central challenges the notion of free will Neurophilosophical conclusions are based on and consistent with scientific knowledge about the brain and its functioning Walter's answer to whether there is free will is It depends The basic questions concerning free will are 1 whether we are able to choose other than we actually do 2 whether our choices are made intelligibly and 3 whether we are really the originators of our choices According to Walter freedom of will is an illusion if we mean by it that under identical conditions we would be able to do or decide otherwise while simultaneously acting only for reasons and being the true originators of our actions In place of this scientifically untenable strong version of free will Walter offers what he calls natural autonomy self determination unaided by supernatural powers that could exist even in an entirely determined universe Although natural autonomy can support neither our traditional concept of guilt nor certain cherished illusions about ourselves it does not imply the abandonment of all concepts of responsibility For we are not mere marionettes with no influence over our thoughts or actions
