Michael P. Clark

Reopening Of Closure Organicism Against Itself:

A Reopening of Closure Murray Krieger, 1989 Surveying the expanding conflict in Europe during one of his famous fireside chats in 1940 President Franklin Roosevelt ominously warned that we know of other methods new methods of attack The Trojan horse The fifth column that betrays a nation unprepared for treachery Spies saboteurs and traitors are the actors in this new strategy Having identified a new type of war a shadow war being perpetrated by Hitler s Germany FDR decided to fight fire with fire authorizing the formation of the Office of Strategic Services OSS to organize and oversee covert operations Based on an extensive analysis of OSS records including the vast trove of records released by the CIA in the 1980s and 90s as well as a new set of interviews with OSS veterans conducted by the author and a team of American scholars from 1995 to 1997 *The Shadow War Against Hitler* is the full story of America s far flung secret intelligence apparatus during World War II In addition to its responsibilities generating processing and interpreting intelligence information the OSS orchestrated all manner of dark operations including extending feelers to anti Hitler elements infiltrating spies and sabotage agents behind enemy lines and implementing propaganda programs Planned and directed from Washington the anti Hitler campaign was largely conducted in Europe especially through the OSS s foreign outposts in Bern and London A fascinating cast of characters made the OSS run William J Donovan one of the most decorated individuals in the American military who became the driving force behind the OSS s genesis Allen Dulles the future CIA chief who ran the Bern office which he called the big window onto the fascist world a veritable pantheon of Ivy League academics who were recruited to work for the intelligence services and not least Roosevelt himself A major contribution of the book is the story of how FDR employed Hitler s former propaganda chief Ernst Putzi Hanfstaengl as a private spy More than a record of dramatic incidents and daring personalities this book adds significantly to our understanding of how the United States fought World War II It demonstrates that the extent and limitations of secret intelligence information shaped not only the conduct of the war but also the face of the world that emerged from the shadows

Sovereignities in Question Jacques Derrida, 2005 Contents Shibboleth For Paul Celan A Self Unsealing Poetic Text Poetics and Politics of Witnessing Language Does Not Belong An Interview The Majesty of the Present Reading Celan s *The Meridian* Rams Uninterrupted Dialogue between Two Infinities the Poem This book brings together five powerful encounters Themes central to all of Derrida s writings thread the intense confrontation between the most famous philosopher of our time and the Jewish poet writing in German who perhaps more powerfully than any other has testified to the European experience of the twentieth century They include the date or signature and its singularity the notion of the trace temporal structures of futurity and the to come the multiplicity of language and questions of translation such speech acts as testimony and promising but also lying and perjury the possibility of the impossible and above all the question of the poem as addressed and destined beyond knowledge seeking to speak to and for the irreducibly other The memory of encounters with thinkers who have also engaged Celan s work animates these writings which include a brilliant

dialogue between two interpretative modes hermeneutics and deconstruction Derrida's approach to a poem is a revelation on many levels from the most concrete ways of reading for example his analysis of a sequence of personal pronouns to the most sweeping imperatives of human existence and Derrida's writings are always a study in the imbrication of such levels Above all he voices the call to responsibility in the ultimate line of Celan's poem The world is gone I must carry you which sounds throughout the book's final essay like a refrain Only two of the texts in this volume do not appear here in English for the first time Of these Schibboleth has been entirely retranslated and has been set following Derrida's own instructions for publication in French A Self Unsealing Poetic Text was substantially rewritten by Derrida himself and basically appears here as the translation of a new text Jacques Derrida's most recent books in English translation include Counterpath Traveling with Jacques Derrida with Catherine Malabou He died in Paris on October 8 2004 Thomas Dutoit teaches at the Universit  de Paris 7 He translated Aporias and edited On the Name both by Jacques Derrida *Tragedy's End* Francis M.

Dunn, 1996-07-25 Euripides is a notoriously problematic and controversial playwright whose innovations according to Nietzsche brought Greek tragedy to an early death Dunn here argues that the infamous and artificial endings in Euripides deny the viewer access to a stable or authoritative reading of the play while innovations in plot and ending opened tragedy up to a medley of comic parodic and narrative impulses Part One explores the dramatic and metadramatic uses of novel closing gestures such as aetiology closing prophecy exit lines of the chorus and deus ex machina Part Two shows how experimentation in plot and ending reinforce one another in Hippolytus Trojan Women and Heracles Part Three argues that in three late plays Helen Orestes and Phoenician Women Euripides devises radically new and untragic ways of representing and understanding human experience *Tragedy's End* is the first comprehensive study of closure in classical literature and will be of interest to a range of students and scholars **Revenge of the Aesthetic** Michael P. Clark, 2023-11-15 This cutting edge collection of essays showcases the work of some of the most influential theorists of the past thirty years as they grapple with the question of how literature should be treated in contemporary theory The contributors challenge trends that have recently dominated the field especially those that emphasize social and political issues over close reading and other analytic methods traditionally associated with literary criticism Written especially for this collection these essays argue for the importance of aesthetics poetics and aesthetic theory as they present new and stimulating perspectives on the directions which theory and criticism will take in the future In addition to providing a selection of distinguished critics writing at their best this collection is valuable because it represents a variety of fields and perspectives that are not usually found together in the same volume Michael Clark's introduction provides a concise cogent history of major developments and trends in literary theory from World War II to the present making the entire volume essential reading for students and scholars of literature literary theory and philosophy This cutting edge collection of essays showcases the work of some of the most influential theorists of the past thirty years as they grapple with the question of how literature should be treated in contemporary theory

The contributors challenge trends th Alternative Kinships Jacob Emery,2017-05-15 According to Marx the family is the primal scene of the division of labor and the germ of every exploitative practice In this insightful study Jacob Emery examines the Soviet Union s programmatic effort to institute a global siblinghood of the proletariat revealing how alternative kinships motivate different economic relations and make possible other artistic forms A time in which literary fiction was continuous with the social fictions that organize the social economy the early Soviet period magnifies the interaction between the literary imagination and the reproduction of labor onto a historical scale Narratives dating back to the ancient world feature scenes in which a child looks into a mirror and sees someone else reflected there typically a parent In such scenes two definitions of the aesthetic coincide art as a fantastic space that shows an alternate reality and art as a mirror that reflects the world as it is In early Soviet literature mirror scenes illuminate the intersection of imagination and economy yielding new relations destined to replace biological kinship relations based in food language or spirit These metaphorical kinships have explanatory force far beyond their context providing a vantage point onto for example the Gothic literature of the early United States and the science fiction discourses of the postwar period *Alternative Kinships* will appeal to scholars of Russian literature comparative literature and literary theory as well as those interested in reconciling formalist and materialist approaches to culture

The Fictive and the Imaginary Wolfgang Iser,1993-03-01 The pioneer of literary anthropology Wolfgang Iser presents a wide ranging and comprehensive exploration of this new field in an attempt to explain the human need for the particular form of make believe known as literature Ranging from the Renaissance pastoral to Coleridge to Sartre and Beckett *The Fictive and the Imaginary* is a distinguished work of scholarship from one of Europe s most respected and influential critics

Seamus Heaney as Aesthetic Thinker Eugene O'Brien,2016-04-04 Seamus Heaney s unexpected death in August 2013 brought to completion his body of work and scholars are only now coming to understand the full scale and importance of this extraordinary career The Nobel Prize winning poet translator and playwright from the North of Ireland is considered the most important Irish poet after Yeats and at the time of his death arguably the most famous living poet For this reason much of the scholarship to date on Heaney has understandably focused on his poetry O'Brien s new work however focuses on Heaney s essays book chapters and lectures as it seeks to understand how Heaney explored the poet s role in the world By examining Heaney s prose O'Brien teases out a clearer understanding of Heaney s sense of the function of poetry as an act of public intellectual and ethical inquiry In doing so O'Brien reads Heaney as an aesthetic thinker in the European tradition considering him alongside Heidegger Derrida Lacan and Adorno Studying Heaney within this theoretical and philosophical tradition sheds new and useful light on one of the greatest creative minds of the twentieth century

The United Stories of America Rolf Lundén,2022-06-08 This book

discusses the American short story composite or short story cycle a neglected form of writing consisting of autonomous stories interlocking into a whole The critical work done on this genre has so far focused on the closural strategies of the composites on how unity is accomplished in these texts This study takes into consideration to a greater degree than earlier criticism the short story composite as an open work emphasizing the tension between the independent stories and the unified work between the discontinuity and fragmentation on the one hand and the totalizing strategies on the other The discussion of the genre is illustrated with references to numerous American short story composites *Three Steps on the Ladder of Writing* Hélène Cixous, 1993 *Three Steps on the Ladder of Writing* is a poetic insightful and ultimately moving exploration of the strange science of writing In a magnetic irresistible narrative Cixous reflects on the writing process and explores three distinct areas essential for great writing The School of the Dead the notion that something or someone must die in order for good writing to be born The School of Dreams the crucial role dreams play in literary inspiration and output and The School of Roots the importance of depth in the nether realms in all aspects of writing Cixous's love of language and passion for the written word is evident on every page Her emotive style draws heavily on the writers she most admires the Brazilian novelist Clarice Lispector the Russian poet Marina Tsvetaeva the Austrian novelists Ingeborg Bachmann and Thomas Bernhard Dostoyevsky and most of all Kafka
