Representations Of Blackness And The Performance Of Identities:

Representations of Blackness and the Performance of Identities Jean Rahier, 1999-05-30 This anthology offers a comparative approach for the study of performances of African diaspora identities in various locales of the Black Atlantic. Articles discuss the spatial dimensions of blackness, the relations between blackness, gender constructs, and social classes. Native American views on blackness and the use of obscenity as a tool of black resistance. **Representations of**

Blackness and the Performance of Identities Jean Rahier, 1999-05-30 The essays gathered in this volume deal with representations of blackness and the performance of black identities in various historically determined societal contexts of the Americas, Benin, and Spain. The book is grounded on the premise that representations constitute in part the world in which we live. An important aspect of the struggles of dominated people consists in more or less overtly challenging, manipulating, combatting, negating, and sometimes inverting representations of themselves reproduced in the dominant discourse of their national society. The contributors approach various forms of blackness within the fluctuation of political, economic, and social processes embedded in particular time-space contexts which are constituted within local, regional, national, and transnational dimensions. Identities, whatever they may be, cannot be defined once and for all in fixed or essentialist terms as if they were unchanging or frozen in time and space. If, as this book proposes, identities are fluid, it is because they are constantly enacted and reenacted, performed anew within specific situations and within changing socioeconomic and political contexts that provide sites for their negotiations and renegotiations, definitions, and redefinitions. Thus, the book approaches black identities as performances. **Music in Latin America and the Caribbean: An**

Encyclopedic History REANNOUNCE/F05: **Volume 2: Performing the Caribbean Experience** Kuss, Malena, The music of the peoples of South and Central America, Mexico, and the Caribbean is treated with unprecedented breadth in this multi-volume work. Taking a sociocultural and human-centered approach, *Music in Latin America and the Caribbean* gathers the best scholarship from writers all over the world to cover in depth the musical legacies of indigenous peoples, creoles, African descendants, Iberian colonizers, and other immigrant groups that met and mixed in the New World. From these texts, music emerges as the powerful tool that negotiates identities, enacts resistance, performs beliefs, and challenges received aesthetics. More than two decades in the making, this work privileges the perspectives of cultural insiders and emphasizes the role that music plays in human life. *Volume 2: Performing the Caribbean Experience* focuses on the reconfiguration of this complex soundscape after the Conquest and on the strategies by which groups from distant worlds reconstructed traditions, assigning new meanings to fragments of memory and welding a fascinating variety of unique Creole cultures. Shaped by an enduring African presence and the experience of slavery and colonization by the Spanish, French, British, and Dutch peoples of the Caribbean islands and circum-Caribbean territories, these groups resorted to the power of music to mirror their history, assert identity, gain freedom, and transcend their experience in lasting musical messages. Essays on pan-Caribbean themes, surveys of traditions,

and riveting personal accounts capture the essence of pluralistic and spiritualized brands of creativity through the voices of an unprecedented number of Caribbean authors including a representative contingent of distinguished Cuban scholars whose work is being published in English translation for the first time in this book Two CDs with 52 recorded examples illustrate the contributions to this volume

Black Studies in Europe Nicole Grégoire, Sarah Fila-Bakabadio, Jacinthe Mazzocchi, 2025-08-15 Reflecting on contemporary epistemologies of European Blackness Long absent from research in the humanities and social sciences Black people in continental Europe have become the focus of a growing body of literature in the past two decades that addresses their unique history and social positioning *Black Studies in Europe* An Anthology of Soil and Seeds brings together essays and case studies by a collective of scholars writers and activists to offer a critical overview of the emerging field of Black European studies and a vital reflection on contemporary epistemologies of European Blackness This collection addresses key questions What is Blackness from a European standpoint Which epistemologies and theoretical tools have been used to offer a better understanding of Black experiences in Europe How is this knowledge being produced and by whom Can we define a common European conceptual framework for Black studies Related to this work is an even more urgent enterprise forging an epistemological distinction between the study of Black people and Black studies as an emancipatory project

Degrees of Mixture, Degrees of Freedom Peter Wade, 2017-05-04 Race mixture or *mestizaje* has played a critical role in the history culture and politics of Latin America In *Degrees of Mixture Degrees of Freedom* Peter Wade draws on a multidisciplinary research study in Mexico Brazil and Colombia He shows how Latin American elites and outside observers have emphasized mixture's democratizing potential depicting it as a useful resource for addressing problems of racism claiming that race mixture undoes racial difference and hierarchy while Latin American scientists participate in this narrative with claims that genetic studies of *mestizos* can help isolate genetic contributors to diabetes and obesity and improve health for all Wade argues that in the process genomics produces biologized versions of racialized difference within the nation and the region but a comparative approach nuances the simple idea that highly racialized societies give rise to highly racialized genomics Wade examines the tensions between mixture and purity and between equality and hierarchy in liberal political orders

exploring how ideas and scientific data about genetic mixture are produced and circulate through complex networks
