Representations of Algebras P. J. Webb, 1987 The latest developments in representation theory with emphasis on the representation type of finite dimensional algebras **Homotopy Theory: Proceedings of the Durham Symposium 1985** E. Rees, J. D. S. Jones, 1987-10-29 This 1987 volume presents a collection of papers given at the 1985 Durham Symposium on homotopy theory They survey recent developments in the subject including localisation and periodicity computational complexity and the algebraic K theory of spaces Representations of Algebras P. Webb, 1986-01-08 The latest developments in representation theory with emphasis on the representation type of finite dimensional algebras

Representations of Finite Dimensional Algebras Hiroyuki Tachikawa, Vlastimil Dlab, Canadian Mathematical Society, 1991 This volume contains the proceedings of the Tsukuba International Conference on Representations of Algebras and Related Topics fifth ICRA held at the University of Tsukuba August 13 18 1990 The conference focused on the rapid development of research on representations of finite dimensional algebras and group representations A subset of the fifty seven lectures are collected here together with a number of other papers not originally presented at the conference With contributions by some of the world's leading experts in this area this book provides a valuable overview of the frontier of research in representations of algebras Group Representations Gregory Karpilovsky, 2016-06-06 This volume is divided into three parts Part I provides the foundations of the theory of modular representations Special attention is drawn to the Brauer Swan theory and the theory of Brauer characters A detailed investigation of quadratic symplectic and symmetric modules is also provided Part II is devoted entirely to the Green theory vertices and sources the Green correspondence the Green ring etc In Part III permutation modules are investigated with an emphasis on the study of p permutation modules and Burnside rings The material is developed with sufficient attention to detail so that it can easily be read by the novice although its chief appeal will be to specialists A number of the results presented in this volume have almost certainly never been published before *Algebras, Rings and Modules* Michiel Hazewinkel, Nadiya Gubareni, V.V. Kirichenko, 2007-09-08 As a natural continuation of the first volume of *Algebras Rings and Modules* this book provides both the classical aspects of the theory of groups and their representations as well as a general introduction to the modern theory of representations including the representations of quivers and finite partially ordered sets and their applications to finite dimensional algebras Detailed attention is given to special classes of algebras and rings including Frobenius quasi Frobenius right serial rings and tiled orders using the technique of quivers The most important recent developments in the theory of these rings are examined The Cartan Determinant Conjecture and some properties of global dimensions of different classes of rings are also given The last chapters of this volume provide the theory of semiprime Noetherian semiperfect and semidistributive rings Of course this book is mainly aimed at researchers in the theory of rings and algebras but graduate and postgraduate students especially those using algebraic techniques should also find this book of interest Bibliographic Guide to Conference

Publications New York Public Library. Research Libraries, 1989 Vols for 1975 include publications cataloged by the Research Libraries of the New York Public Library with additional entries from the Library of Congress MARC tapes

Representations and Nilpotent Orbits of Lie Algebraic Systems Maria Gorelik, Vladimir Hinich, Anna Melnikov, 2019-10-18 This volume a celebration of Anthony Joseph's fundamental influence on classical and quantized representation theory explores a wide array of current topics in Lie theory by experts in the area The chapters are based on the 2017 sister conferences titled Algebraic Modes of Representations the first of which was held from July 16-18 at the Weizmann Institute of Science and the second from July 19-23 at the University of Haifa The chapters in this volume cover a range of topics including Primitive ideals Invariant theory Geometry of Lie group actions Quantum affine algebras Yangians Categorification Vertex algebras This volume is addressed to mathematicians who specialize in representation theory and Lie theory and who wish to learn more about this fascinating subject

Studies in Lie Theory Anthony Joseph, Joseph Bernstein, 2006-01-26 Contains new results on different aspects of Lie theory including Lie superalgebras quantum groups crystal bases representations of reductive groups in finite characteristic and the geometric Langlands program

Representation Theory of Algebras and Related Topics Raymundo Bautista, Roberto Martínez-Villa, José Antonio de la Peña, 1996 The 14 selected papers discuss recent thinking and findings on the representation theory of algebras and its interaction with other areas of mathematics such as algebraic geometry ring theory and the representation of groups The topics include coils and multicoil algebras representations of wild quivers the Tits form of a tame algebra almost split sequences and triangles for Artin algebras and orders and using approximations to analyze the structure of representations No index Members of the Canadian Mathematical Society may order at the AMS member price of \$75 Annotation copyright by Book News Inc Portland OR
