

INTRODUCTION

Representing Reason: Feminist Theory and Formal Logic

MARGARET HARRIS AND RICHARD JOHN FALICKSON

This volume brings together recent essays addressing feminist issues in formal logic and logical issues in feminist theory. As the first volume with this specific focus, its place would be a somewhat unique. Among logicians, the thought that feminists might have something of value to say about formal logic is usually treated with skepticism at best dismissal. The convergence of feminism and logic may also be met with skepticism among some feminists who perceive the prospects of feminism to be aimed at more pressing political concerns than the problematics of abstract theory.

It is our hope that this collection will dispense those preconceptions. The chapters in follow reveal that many core concepts at issue in recent feminist theorizing and in philosophical logic overlap. The thematic concern of the volume is the relationship between our individual assumptions about concepts such as difference, identity, and generality and our efforts to produce precise, formal representations of those concepts. It is here that feminist theory and philosophical logic engage most fruitfully.

Feminist theory has long argued that the exclusion of women from philosophical work was more than simply a matter of unfair treatment. When feminist activists made it possible for women to be "added" into theory, the full impact of their prior exclusion was finally revealed. This exclusion, in terms of the exclusion of both women thinkers from the academy and women's lives from philosophical consideration, was pervasively shown to underwrite the presumed neutrality of many of philosophy's most cherished assumptions in areas ranging from political theory to ethics.
