

multidisciplinary aspect of dealing with epileptic patients.

The editors can be congratulated on having up-dated their book, which has several references to 1981 publications. However, this reviewer would have liked to see more references to work in non-English speaking countries and a more adequate index.

Reproductive Pasts, Reproductive Futures: Genetic Counselling and its Effectiveness. By J. R. Sorenson, J. P. Swazey and N. A. Scotch. (Pp. 194; £26.00.) Alan R. Liss: New York.

Reproductive Pasts, Reproductive Futures: Genetic Counselling and its Effectiveness is a lyrical title for an American study of the 'effectiveness' of genetic counselling. The authors, from the Department of Socio-medical Sciences and Community Medicine, Boston, Massachusetts, have collated results from over 2000 clients in 47 clinics. The objectives were the delineation of client needs, client education and the impact of counselling on client reproductive intentions. Data were collected by extensive questionnaires from both the clients and counsellors. Although this is not a new approach to assessing the effectiveness of a service, it is the largest reported prospective study of genetic counselling services.

Perhaps the authors were somewhat surprised, or merely cynical about their own conclusions. Fewer than half of the clients were able to retain information on diagnosis or recurrence risk and, similarly, many were neither influenced nor helped with their reproductive plans. Counsellors also had their share of problems; training and experience did not alter the effectiveness of the counsellor-client relationship. In this study, most clients came for counselling having been referred by one or more specialists (tertiary medical care), whereas in Britain many patients refer themselves. This may partly explain the higher 'success' rate reported in the recent London studies.

Client concerns and the counsellors' perception of these needs are often discrepant. Education of both parties is a complex issue. This study highlights in a detailed and objective manner the faults which can occur; its brief does not extend to attempting to provide all the answers.

In keeping with the March of Dimes Birth

Defects original article series, this monograph is elegantly and simply presented, with comprehensive appendices, references and index. It can be recommended to all those concerned with providing genetic counselling services. Further reports detailing other aspects of this study are planned.

R. PROOPS

Handbook of Psychiatry. General editor M. Shepherd.

Volume 1. *General Psychopathology.* Edited by M. Shepherd and O. L. Zangwill. (Pp. 307; illustrated; £27.50 hb, £9.95 pb.) Cambridge University Press: Cambridge. 1983.

Volume 3. *Psychoses of Uncertain Aetiology.* Edited by J. K. Wing and L. Wing. (Pp. 313; illustrated; £27.50 hb, £9.95 pb.) Cambridge University Press: Cambridge. 1982.

These two books, each of approximately 300 pages and more than 200 000 words, constitute the first instalment of a massive five-volume handbook of psychological medicine. The remaining three volumes are scheduled to follow soon. In his foreword the general editor stakes a claim to comprehensiveness, and the layout gives evidence of the considerable care which has been taken to facilitate the reader's access to the material. The overall plan is tripartite: a single volume devoted to general psychopathology; three clinical volumes, dealing respectively with organic psychiatry, the functional psychoses, and the neuroses, personality and childhood disorders; and a final volume on the scientific foundations of psychiatry, including overviews of philosophy, epidemiology, genetics, the social sciences, psychology, ethology and the neurosciences. The chapters are divided by numbered sub-headings which appear in both the contents and the cross-references to other volumes. The notation in the text is expanded by a special index in each volume for cross-referencing by chapter and subheading to other volumes, making it possible to pursue a topic through the various aspects in which it is presented, thus eliminating overlap and repetition. In addition, there are subject and author indices and references at the end of each volume.

The first volume acknowledges the seminal contribution of Karl Jaspers and opens appropriately with an exposition of the framework of
