Systemic Ethics and Non-Anthropocentric Stewardship Janet McIntyre-Mills, 2014-10-01 This book makes a case for rights and responsibilities to be expressed through a cosmopolitan praxis based on developing strong cosmopolitan approaches This developed approach respects a form of cultural or national identity that is not at the expense of others the environment or future generations This new stoicism is based on a sense of responsibility for others The book also explores systemic ethical praxis in response to the vexed challenge of how to bridge the false dualism of pitting the environment versus profit Systemic Ethics and Non Anthropocentric Stewardship Implications for Transdisciplinarity and Cosmopolitan Politics is organized into seven chapters The book begins by providing readers with an understanding of the way in which cosmopolitanism like all social concepts is shaped by diverse definitions and applied differently by theorists and those that

engage in transformative praxis It also develops an argument based on considering the empirical consequences of social economic and environmental decisions on the quality of life of current and future generations The next chapter critiques anthropocentrism and explores how policy makers develop agreements on what constitutes and supports the wellbeing of the planet rather than the GDP The book then explores the options for social democracy and ways to enhance an ethical approach to post national governance and argues for participatory democracy and governance to respond to diversity within and across national boundaries The following chapters reflect upon the author's own participatory action research process and examines the transformations that can arise through critical systemic thinking and practice Next the book makes the case for systemic ethical governance that is able to manage consumption before concluding with a final look at the book's approach based on critical heuristics
