being of the researcher as a person It addresses the relation between research and practice in a manner that sees teaching and learning in the science classroom as interdependent with national policies and curriculum traditions about science It gives graduate students and other early researchers an unusual overview of their research area as a whole Established researchers will be interested in and challenged by the identity the author ascribes to the research and by the plea he makes for the science content itself to be seen as problematic Resources in Education ,1971 *Catalog of Copyright Entries.
