a context for the local anymore but forms more and more a practice of itself in which an increasing number of actors play their part As we can see on the World Wide Web people and firms are both emitters and receptors and act on the local and global level at the same time Local diversity in a world with increasing interdependencies is shown in a number of contributions from different parts of the world These contributions are clustered around two main themes Labor markets in global and local scenarios From industry to services Global industries Restructuring and local jobs The many case studies presented shed light to the diversity that occurs in different local situations
