Bainbridge,2013-12-04 Since the beginning of the century there have been calls for the integration of traditional individualistic micro and management macro paradigms in Human Resource Management studies In order to understand this so called black box the HR field needs research which is more sensitive to institutional and cultural contexts focusing on formal and informal relationships between employees supervisors and HR managers and the means by which these organizational participants enable and motivate one another This book presents advanced quantitative and mixed research methods that can be used to analyze integrated macro and micro paradigms within the field of Human Resource Management Multi actor social network and longitudinal research practices among others are explored Readers will gain insight into the advantages and disadvantages of different research methods in order to evaluate which type is most suitable to their research This book is suitable for both advanced researchers and graduate students **Research Methods in Human Resource Management** Eugene F. Stone-Romero,Patrick J. Rosopa,2020-05-01 Empirical research in HRM has focused on such issues as recruiting testing selection training motivation compensation and employee well being A review of the literature on these and other topics suggests that less than optimal methods have often been used in many HRM studies Among the methods related problems are using a measures or manipulations that have little or no construct validity b samples of units e g participants organizations that bear little or no correspondence to target populations c research designs that have little or no potential for supporting valid causal inferences d samples that are too small to provide for adequate statistical power and e data analytic strategies that are inappropriate for the issues addressed by a study As a result our understanding of various HRM phenomena has suffered and improved methods may serve to enhance both the science and practice of HRM In view of the above the purpose of this volume of Research in Human Resource Management is to provide basic and applied researchers with resources that will enable them to improve the internal validity external validity construct validity and statistical conclusion validity of research in HRM and the related fields of industrial and organizational psychology and organizational behavior Sound research in these fields should serve to improve both science and practice With respect to science support for a theory hinges on the validity of research used to support it In addition the results of valid research are essential for the development and implementation of HRM policies and practices In the interest of promoting valid research based inferences in HRM research the chapters in this volume identify a wide range of methods related problems and offer recommendations for dealing with them Chapters in it address such HRM research related topics as neglected research issues causal inferences in research heteroscedasticity in research range restriction in research interrater agreement indices and construct validity issues in measures of such constructs as job performance organizational politics and safety climate
