Introduction

American families were subject to a continuous evolution due to changing external circumstances, and this fact explains drastic changes in these institutions over time. Moreover, the beliefs attributed to them were conditional not only upon such shifts but also on valued emotions (Poptech, 2011). Therefore, it is critical to examine the process of formation of present-day family life through the lens of its transformation and principal characteristics.

Family Life: Three Periods

At the time of Colonial America, during the consequent period of the emerging modern family, and after the formation of the contemporary family, the situation of this institution differed drastically. First, before 1820, Americans emphasized the alleged economic dependency of women on their husbands, and this fact determined their seemingly disadvantaged position (Cohen, 2020). Moreover, they emphasized the correlation between one's marital status and success in life (Cohen, 2020). Later on, during 1820-1900, the perceptions shifted toward the significance of individual choices and increased autonomy (Cohen, 2020). For family life, it meant that the evolution of gender roles resulted in women actively exercising their rights and freedoms, and divorces became common (Cohen, 2020). Consequently, during 1900-1960, modern families appeared, and they were characterized by an earlier age of getting married and poor economic conditions, which implied cooperation for survival (Cohen, 2020). Thus, over history, families went through periods of dependency on women, their increasing freedom, and combined efforts.

The Origins of the American Family

The "origins" of the American family can be viewed as the consequences of external factors, which affected marriage. In the beginning, they were related to men's greater capability in providing for families, which determined their significant roles (Cohen,
