Rugman, 2003 This handbook synthesises some literature of the last 40 years in 28 chapters The coverage is split into the following areas the history and theory of the multinational enterprise the political and policy environment of international business **Regional and Global Multinationals**

Christoph Czychon, 2021-06-29 Based on their ability to facilitate interdependencies across the borders of national and regional markets multinationals enterprises MNEs act as the key drivers of world trade and investment activities While recent global challenges additionally highlight the need to explain and assess the status and progress of internationality regionality previous research renders the concept of firm level globalization as a special but not the general case Christoph Czychon dedicates specific attention to the research on regional and global MNEs based on an extensive and rigorous review of the existing academic literature as well as the analysis of 2005 2015 empirical data from the European context with a focus on CAC40 and DAX30 listed firms In doing so the author offers insights and results that stand in contrast to the original narrative of the debate and presents a comprehensive and updated perspective on regional and global MNEs Global Aspects of Reputation and Strategic Management

David Deephouse, Naomi Gardberg, William Newburry, 2019-07-16 Our grasp of reputation as a strategic asset would benefit from a better understanding of how country level factors influence reputation development as well as how reputation obtained in one context can be transferred to another This volume of Research in Global Strategic Management focuses on global aspects of reputation in strategic management Multinational Firms' Location and the New Economic Geography Jean Louis Mucchielli, Thierry Mayer, 2004-01-01 The choice of location for the production plants of multinational firms is an important issue not least because this decision is accompanied by so many fears brought into public debate This book analyses how foreign direct investors choose their locations whilst exploring the forces which shape international economic geography Although these two issues are to some extent inter related researchers have only recently acknowledged the similarity of economic geography and international business approaches to the empirical assessment of likely causes of the degree of spatial concentration observed in many modern industries Giving insight into the direction that future research should take this book contains state of the art papers on both theoretical and empirical levels This original collection makes a particularly important contribution to our understanding of the existence and impact of home market effects Introducing a welcome synthesis between two related and yet rarely integrated areas of study using case studies of firms in Europe US MNEs and the Mexican automobile industry this book will be welcomed by both academic and practising economists Regional scientists and Chinese Management ShouQuing Wang, 2005
