Siegers, Jenny de Jong-Gierveld, Evert van Imhoff, 2012-12-06 Since 1987 the investigation of the relationship between female labour market behaviour and fertility which forms part of the research programme of the Economic Institute Centre for Interdisciplinary Research on Labour Market and Distribution Issues CIAV of Utrecht University also became a part of the research programme of the Netherlands Interdisciplinary Demographic Institute NIDI Since then I have been entrusted with research on this topic In this context I acted on a suggestion made by Frans Willekens to organize an international workshop with the help of other members of the NIDI staff and with the administrative and organizational support of the NIDI This resulted in the workshop Female Labour Market Behaviour and Fertility Preferences Restrictions Behaviour held at the Netherlands Interdisciplinary Demographic Institute in The Hague April 20 22 1989 under the auspices of the European Association for Population Studies EAPS In this workshop demographers econometricians economists psychologists and socio logists discussed the paths to a truly interdisciplinary approach to the relationship between female labour market behaviour and fertility Such an interdisciplinary approach requires a common theoretical framework The rational choice framework was considered to be best suited to this purpose As a consequence the workshop was not only structured by what was studied but also by how it was studied This volume consists of the papers presented at the above mentioned workshop as revised by the authors in collaboration with the editors      Labour Markets Under Different Employment Conditions D. I. Mackay, D. Boddy, J. Brack, J. A. Diack, N. Jones, 2024-09-18 Originally published in 1971 this wide ranging study illuminates many crucial wage and employment issues by examining the operation of local labour markets and by testing labour market theory against the observed behaviour of employers and employees in different labour market environments It is based on an empirical investigation of engineering plants both in major conurbations and in smaller labour market areas There is an emphasis on measurement and quantification which provides a fund of information on such subjects as wage structures labour turnover recruitment and mobility internal labour markets manpower forecasting apprentice training and redundancy The authors outline the weaknesses of applying economic theory to labour market behaviour      **Women in the Labour Market in Changing Economies** Brígida García, Richard Anker, Antonella Pinnelli, 2003-05-15 This book examines a central issue in understanding recent changes in demographic patterns and the labour market the increased participation of women in the workforce and how the nature of this participation has developed In the context of such economic and labour phenomena as globalization increasing flexibility in work patterns intermittent and part time employment and in many countries high underemployment or unemployment the role of women workers has transformed dramatically This book explores a number of demographic issues associated with these developments such as migration in the developed world and transition economies family formation and dissolution the autonomy of women

migrants household composition the evolution of gender systems and contraceptive behaviour both as factors that determine the labour market conditions for women and their income levels and as demographic outcomes The studies cover a wide range of situations from societies with a strong patriarchal ideology and residential female seclusion to industrialized countries with policies designed to assist women manage both a work and a family role and makes use of extensive data sets collected at country level The Editors have sought to maintain an interdisciplinary outlook in the book and to draw policy implications from the various socio economic situations examined Handbook of Research Methods in Behavioural Economics Morris Altman,2023-03-02 This comprehensive Handbook addresses a wide variety of methodological approaches adopted and developed by behavioural economists exploring the implications of such innovations for analysis and policy

**The Flow Analysis of Labour Markets** Ronald Schettkat,1996-08-08 Well functioning labour markets are a precondition for economic development In order to function smoothly the market needs to be able to adjust effectively and quickly to new developments An understanding and analysis of adjustment processes within labour markets is therefore essential for economic theory and policy proposals This study discusse *Labour Market Economics (Routledge Revivals)* D Sapsford,2013-04-17 First published in 1981 Labour Market Economics develops the basic economic theory of introductory courses within the context of labour market analysis and applies it both to particular features and special problems of the subject The author begins by outlining the nature of the area and the structure of the UK labour market at the time and proceeds to explain and elaborate the tools of theoretical analysis These are then applied in subsequent chapters to a variety of issues including the economic analysis of trade unions collective bargaining and the effects of unions unemployment wage inflation and the inequality of pay Throughout the book emphasis is placed on the economic theory of the labour market and the role of empirical work in testing its predictions and wherever available evidence from studies of the UK labour markets is cited

**Homeownership and the Labour Market in Europe** Casper van Ewijk,Michiel van Leuvensteijn,2009-03-12 Increasing labour market flexibility is at the top of the European agenda A new and challenging view is a lack of mobility in the labour market may arise from rigidities in the housing market The research in this book has been inspired by the intriguing hypothesis put forward by Andrew Oswald that homeownership may be a hindrance to the smooth working of the labour markets as homeowners tend to be less willing to accept jobs outside their own region This book brings together leading economists from across Europe to analyse the interaction between housing markets and labour markets In the EU homeownership rates have been on the increase often as a result of government policies making the barriers that homeownership creates in terms of labour mobility increasingly important This book shows on the one hand at the individual level that homeownership limits the likelihood of becoming unemployed and increases the probability of finding a job once unemployed On the other hand the transaction costs inherent in the housing market and homeownership hamper job to job changes and increase unemployment at the country level This insight provides a clear policy message to European

policymakers reform in the housing market aimed at lowering transaction costs and providing less generous subsidies for homeowners could be an effective instrument for reducing unemployment and improving labour market flexibility      Labour Market Reform in China Xin Meng,2000-05-11 Labour Market Reform in China documents and analyses institutional changes in the Chinese labour market over the last twenty five years and argues that further reform is necessary if China is to sustain its high growth rates The book first assesses the problems associated with the pre reform labour arrangements It offers an in depth analysis of the urban labour market and its impact on individual wage determination ownership structure labour compensation and labour demand and of social security reform In its main chapters the book investigates the impact of rural economic reform on rural labour market Detailed consideration is given to the rural agricultural labour market labour arrangement in the rural non agricultural sector and the wage gap between the rural agricultural and non agricultural sectors Finally the book examines the phenomenon of rural urban migration its impact on rural and urban economic growth and models its effect on urban employment unemployment and earnings      **Religion and Politics** John T. S. Madeley,2019-07-15 This title was first published in 2003 This subject area of this work cross cuts conventional sub disciplinary boundaries in the study of comparative politics Connections between religion and and politics can be identified in all of the thematic areas covered by the articles within
