**Finding Lost Space** Roger Trancik, 1991-01-16 The problem of lost space or the inadequate use of space afflicts most urban centers today. The automobile, the effects of the Modern Movement in architectural design, urban renewal and zoning policies, the dominance of private over public interests as well as changes in land use in the inner city have resulted in the loss of values and meanings that were traditionally associated with urban open space. This text offers a comprehensive and systematic examination of the crisis of the contemporary city and the means by which this crisis can be addressed. Finding Lost Space traces leading urban spatial design theories that have emerged over the past eighty years: the principles of Sitte and Howard, the impact of and reactions to the Functionalist movement and designs developed by Team 10, Robert Venturi, the Krier brothers and Fumihiko Maki to name a few. In addition to discussions of historic precedents, contemporary approaches to urban spatial design are explored. Detailed case studies of Boston, Massachusetts, Washington D C, Goteborg, Sweden and the Byker area of Newcastle, England demonstrate the need for an integrated design approach, one that considers figure ground linkage and place theories of urban spatial design. These theories and their individual strengths and weaknesses are defined and applied in the case studies, demonstrating how well they operate in different contexts. This text will prove invaluable for students and professionals in the fields of architecture, landscape architecture and city planning. Finding Lost Space is going to be a primary text for the urban designers of the next generation. It is the first book in the field to absorb the lessons of the postmodern reaction, including the work of the Krier brothers and many others, and to integrate these into a coherent theory and set of design guidelines. Without polemics, Roger Trancik addresses the biggest issue in architecture and urbanism today: how can we regain in our shattered cities a public realm that is made of firmly shaped

coherently linked humanly meaningful urban spaces Robert Campbell AIA Architect and architecture critic Boston Globe
