Magical Thinking Poems:

Magical Thinking Joseph Duemer, 2001 Psychologists characterize thinking as a form of thought in which wishes and desires shape the reality we perceive. Such thinking is usually dismissed as delusional. But most human beings think magically most of the time and have done so throughout history. It is the kind of thinking that has produced cathedrals and symphonies, depravity and genocide. Joseph Duemer's poems attempt to shape his magical thinking into understandable forms. His poetry is an argument with science and religion which seek to establish themselves as systems that organize experience into stable meanings.

Your Therapist Says It's Magical Thinking Sadie McCarney, 2023-04-18 Sadie McCarney's *Your Therapist Says It's Magical Thinking* is a buoyant second collection that playfully navigates the turbulent waters of life with mental illness and neurodivergence. In much of the book, history and science are treated the way they are often viewed by a brain in mental turmoil: places and events get switched around, facts get rewritten, and the fantastical reigns supreme. Through poems ranging from didactic to the horrible, self-care advice received by the poet when she was struggling most to historical fiction patients in an asylum in 1800s England to the quirky and unexpectedly fantastical, a rainbow carpool unicorn, a young child's timeline reversing each morning, and an everything bagel that includes competing theories of time, McCarney digs deep into the muck of her own lived experience. She resurfaces with, if not gold, at least an old-time capsule and a few treasured hunks of bone. *Your Therapist Says It's Magical Thinking* highlights the sometimes dubious but always jubilant inner workings of a mentally unwell brain at play, especially within the context of a larger society that frequently seeks to tamp down this weird and rare form of magic.

[How Poems Think](#) Reginald Gibbons, 2015-09-23 To write or read a poem is often to think in distinctively poetic ways, guided by metaphors, sound, rhythms, associative movement, and more. Poetry's stance toward language creates a particular intelligence of thought and feeling, a compressed articulation that expands inner experience, imagining with words what cannot always be imagined without them. Through translation, poetry has diversified poetic traditions, and some of poetry's ways of thinking begin in the ancient world and remain potent even now. In *How Poems Think*, Reginald Gibbons presents a rich gallery of poetic inventiveness and continuity drawn from a wide range of poets: Sappho, Pindar, Shakespeare, Keats, William Carlos Williams, Marina Tsvetaeva, Gwendolyn Brooks, and many others. Gibbons explores poetic temperament, rhyme, metonymy, etymology, and other elements of poetry as modes of thinking and feeling. In

100 Poems to Break Your Heart Edward Hirsch, 2021 We are not so much diminished as enlarged by grief by our refusal to vanish or to let others vanish without leaving a verbal record The poet is one who will not be reconciled who is determined to leave a trace in words to transform oceanic depths of feeling into the faithful nuances of art Poetry companions us Poems are written in solitude but they reach out to others which makes poetry a social act It rises out of one solitude to meet another Poems of terrible sadness and loss trouble and challenge us but they also make us feel less alone and more connected Our own desolations become more recognizable to us more articulate something shared We become less isolated in our sorrow and thus are befriended by the words of another There is something ennobling in grief that is compacted expressed and transfigured into poetry

Book jacket *Augustan Poetry and the Irrational* Philip R. Hardie, 2016 The establishment of the Augustan regime presents itself as the assertion of order and rationality in the political ideological and artistic spheres after the disorder and madness of the civil wars of the late Republic But the classical Apollonian poetry of the Augustan period is fascinated by the irrational in both the public and private spheres There is a vivid memory of the political and military furor that destroyed the Republic and also an anxiety that furor may resurface that the repressed may return Epic and elegy are both obsessed with erotic madness Dido experiences in her very public role the disabling effects of love that are both lamented and celebrated by the love elegists Didactic especially the Georgics and the related Horatian exercises in satire and epistle offer programmes for constructing rational order in the natural political and psychological worlds but at best contain

uneasily an ever present threat of confusion and backsliding and for the most part fall short of the austere standards of rational exposition set by Lucretius Dionysus and the Dionysiac enjoy a prominence in Augustan poetry and art that goes well beyond the merely ornamental The person of the emperor Augustus himself tests the limits of rational categorization Augustan Poetry and the Irrational contains contributions by some of the leading experts of the Augustan period as well as a number of younger scholars An introduction which surveys the field as a whole is followed by chapters that examine the manifestations of the irrational in a range of Augustan poets including Virgil Horace Ovid and the love elegists and also explore elements of post classical reception *The Book of Ezekiel and the Poem of Erra* Daniel Bodi,1991

Shakespeare's Sonnets and Narrative Poems A. D. Cousins,2014-07-21 Alongside Spenser Sidney and the early Donne Shakespeare is the major poet of the 16th century largely because of the status of his remarkable sequence of sonnets Professor Cousins new book is the first comprehensive study of the Sonnets and narrative poems for over a decade He focuses in particular on their exploration of self knowledge sexuality and death as well as on their ambiguous figuring of gender Throughout he provides a comparative context looking at the work of Shakespeare s contemporaries The relation between Shakespeare s non dramatic verse and his plays is also explored **Futures of Enlightenment Poetry** Dustin D. Stewart,2020-10-30 This book offers a revisionist account of poetry and embodiment from Milton to Romanticism Scholars have made much of the period s theories of matter with some studies equating the eighteenth century s modernity with its materialism Yet the Enlightenment in Britain also brought bold new arguments for the immateriality of spirit and evocative claims about an imminent spirit realm Protestant religious writing was of two minds about futurity swinging back and forth between patience for the resurrected body and desire for the released soul This ancient pattern carried over the book argues into understandings of poetry as a modern devotional practice A range of authors agreed that poems can provide a foretaste of the afterlife but they disagreed about what kind of future state the imagination should seek The mortalist impulse exemplified by John Milton and by Romantic poets Anna Letitia Barbauld and William Wordsworth is to overcome the temptation of disembodiment and to restore spirit to its rightful home in matter The spiritualist impulse driving eighteenth century verse by Mark Akenside Elizabeth Singer Rowe and Edward Young is to break out of bodily repetition and enjoy the detached soul s freedom in advance Although the study isolates these two tendencies each needed the other as a source in the Enlightenment and their productive opposition didn t end with Romanticism The final chapter identifies an alternative Romantic vision that keeps open the possibility of a disembodied poetics and the introduction considers present day Anglophone writers who put it into practice Magical Consciousness Susan Greenwood,Erik D. Goodwyn,2015-08-20 How does a mind think magically The research documented in this book is one answer that allows the disciplines of anthropology and neurobiology to come together to reveal a largely hidden dynamic of magic Magic gets to the very heart of some theoretical and methodological difficulties encountered in the social and natural sciences especially to do with issues of

rationality This book examines magic head on not through its instrumental aspects but as an orientation of consciousness Magical consciousness is affective associative and synchronistic shaped through individual experience within a particular environment This work focuses on an in depth case study using the anthropologist s own experience gained through years of anthropological fieldwork with British practitioners of magic As an ethnographic view it is an intimate study of the way in which the cognitive architecture of a mind engages the emotions and imagination in a pattern of meanings related to childhood experiences spiritual communications and the environment Although the detail of the involvement in magical consciousness presented here is necessarily specific the central tenets of *modus operandi* is common to magical thought in general and can be applied to cross cultural analyses to increase understanding of this ubiquitous human phenomenon
