News For Everyman Radio And Foreign Affairs In Thirties America:

News for Everyman David H. Culbert, 1976-03-23 His research has been relentless and his appraisals impeccable Add for good measure a delightful literary style Eric Barnouw **Radio and the Great Debate over U.S. Involvement in World War II** Mark S. Byrnes, 2022-12-13 The debate over US involvement in World War II was a turning point in the history of both US foreign policy and radio In this book the author argues that the debate s historical significance cannot be fully appreciated unless these stories are understood in relation rather than in isolation All the participants in the Great Debate took for granted the importance of radio and made it central to their efforts While they generally worked within radio s rules they also tried to work around or even break those rules setting the stage for changes that ultimately altered the way media managed American political discourse This study breaks with traditional accounts that see radio as an industry biased in favor of interventionism Rather radio fully aired the opposing positions in the debate It nonetheless failed to resolve fully their differences Despite the initial enthusiasm for radio s educational potential participants on both sides came to doubt their conviction that radio could change minds Radio increasingly became a tool to rally existing supporters more than to recruit new ones Only events ended the debate over US involvement in World War II The larger question of what role the US should play in world affairs remained **Americans in a World at War** Brooke L. Blower, 2023 Americans in a World at War tells the panoramic and often surprising story of seven worldly Americans their personal histories their politics and the paths that led them to board a Pan American Airways seaplane bound for Lisbon in February 1943 When the Yankee Clipper crashed in the Tagus River it took numerous lives but left a paper trail that leads to a richer deeper understanding of Americans diverse global commitments during the first half of the twentieth century as well as how the Second World War would transform those engagements **Journalism's Roving Eye** John Maxwell Hamilton, 2011-08-15 In all of journalism nowhere are the stakes higher than in foreign news gathering For media owners it is the most difficult type of reporting to finance for editors the hardest to oversee Correspondents roaming large swaths of the planet must acquire expertise that home based reporters take for granted facility with the local language for instance or an understanding of local cultures Adding further to the challenges they must put news of the world in context for an audience with little experience and often limited interest in foreign affairs a task made all the more daunting because of the consequence to national security In Journalism s Roving Eye John Maxwell Hamilton a historian and former foreign correspondent provides a sweeping and definitive history of American foreign news reporting from its inception to the present day and chronicles the economic and technological advances that have influenced overseas coverage as well as the cavalcade of colorful personalities who shaped readers perceptions of the world across two centuries From the colonial era when newspaper printers hustled down to wharfs to collect mail and periodicals from incoming ships to the ongoing multimedia press coverage of the Iraq War Hamilton explores journalism s constant and not always successful efforts at dishing the foreign news as James Gordon

Bennett put it in the mid nineteenth century to describe his approach in the New York Herald He details the highly partisan coverage of the French Revolution the early emergence of special correspondents and the challenges of organizing their efforts the profound impact of the non yellow press in the run up to the Spanish American War the increasingly sophisticated machinery of propaganda and censorship that surfaced during World War I and the golden age of foreign correspondence during the interwar period when outlets for foreign news swelled and a large number of experienced independent journalists circled the globe From the Nazis intimidation of reporters to the ways in which American popular opinion shaped coverage of Communist revolution and the Vietnam War Hamilton covers every aspect of delivering foreign news to American doorsteps Along the way Hamilton singles out a fascinating cast of characters among them Victor Lawson the overlooked proprietor of the Chicago Daily News who pioneered the concept of a foreign news service geared to American interests Henry Morton Stanley one of the first reporters to generate news on his own with his 1871 expedition to East Africa to find Livingstone and Jack Belden a forgotten brooding figure who exemplified the best in combat reporting Hamilton details the experiences of correspondents editors owners publishers and network executives as well as the political leaders who made the news and the technicians who invented ways to transmit it Their stories bring the narrative to life in arresting detail and make this an indispensable book for anyone wanting to understand the evolution of foreign news gathering Amid the steep drop in the number of correspondents stationed abroad and the recent decline of the newspaper industry many fear that foreign reporting will soon no longer exist But as Hamilton shows in this magisterial work traditional correspondence survives alongside a new type of reporting Journalism s Roving Eye offers a keen understanding of the vicissitudes in foreign news an understanding imperative to better seeing what lies ahead *American Studies* Jack Salzman, *American Studies* Association, 1986-08-29 This is an annotated bibliography of 20th century books through 1983 and is a reworking of *American Studies An Annotated Bibliography of Works on the Civilization of the United States* published in 1982 Seeking to provide foreign nationals with a comprehensive and authoritative list of sources of information concerning America it focuses on books that have an important cultural framework and does not include those which are primarily theoretical or methodological It is organized in 11 sections anthropology and folklore art and architecture history literature music political science popular culture psychology religion science technology medicine and sociology Each section contains a preface introducing the reader to basic bibliographic resources in that discipline and paragraph length non evaluative annotations Includes author title and subject indexes ISBN 0 521 32555 2 set 150 00 *Encyclopedia of American Journalism* Stephen L. Stuckey,2013-11-01 No modern president has had as much influence on American national politics as Franklin D Roosevelt During FDR s administration power shifted from states and localities to the federal government within the federal government it shifted from Congress to the president and internationally it moved from Europe to the United States All of these changes required significant effort on the part of the president who triumphed over fierce opposition and succeeded in remaking the American political system in ways that continue to shape our politics today Using the metaphor of the good neighbor Mary E Stuckey examines the persuasive work that took place to authorize these changes Through the metaphor FDR s administration can be better understood his emphasis on communal values the importance of national mobilization in domestic as well as foreign affairs in defense of those values his use of what he considered a particularly democratic approach to public communication his treatment of friends and his delineation of enemies and finally the ways in which he used this rhetoric to broaden his neighborhood from the limits of the United States to encompass the entire world laying the groundwork for American ideological dominance in the post World War II era
Now the News Edward Bliss, Jr.,2010-06-01 Walter Cronkite *News Parade* Joseph Clark,2020-05-19 A fascinating look at the United States conflicted relationship with news and the media through the lens of the newsreel When weekly newsreels launched in the early twentieth century they offered the U S public the first weekly record of events that symbolized indisputable evidence of the news In *News Parade* Joseph Clark examines the history of the newsreel and how it

changed the way Americans saw the world. He combines an examination of the newsreel's methods of production, distribution, and reception with an analysis of its representational strategies to understand the newsreel's place in the history of twentieth-century American culture and film history. Clark focuses on the sound newsreel of the 1930s and 1940s, arguing that it represents a crucial moment in the development of a spectacular society where media representations of reality became more fully integrated into commodity culture. Using several case studies, including the newsreel's coverage of Charles Lindbergh's transatlantic flight and the Sino-Japanese War News Parade, he shows how news film transformed the relationship between its audience and current events, as well as the social and political consequences of these changes. It pays particular attention to how discourses of race and gender worked together with the rhetoric of speed, mobility, and authority to establish the power and privilege of newsreel spectatorship. In the age of fake news and the profound changes to journalism brought on by the internet, News Parade demonstrates how new technologies and media reshaped the American public's relationship with the news in the 1930s, a history that can help us to better understand the transformations happening today.
