Charles E. Curran

Notes On Moral Theology 1965 198:

Catholic Moral Theology in the United States Charles E. Curran, 2008-04-11 In this magisterial volume Charles E. Curran surveys the historical development of Catholic moral theology in the United States from its 19th century roots to the present day. He begins by tracing the development of pre-Vatican II moral theology that, with the exception of social ethics, had the limited purpose of training future confessors to know what actions are sinful and the degree of sinfulness. Curran then explores and illuminates the post-Vatican II era with chapters on the effect of the Council on the scope and substance of moral theology, the impact of *Humanae vitae*, Pope Paul VI's encyclical condemning artificial contraception, fundamental moral theology, sexuality and marriage, bioethics and social ethics. Curran's perspective is unique. For nearly 50 years he has been a major influence on the development of the field and has witnessed first-hand the dramatic increase in the number and diversity of moral theologians in the academy and the Church. No one is more qualified to write this first and only comprehensive history of Catholic moral theology in the United States.

Gay and Lesbian Rights Richard Peddicord, 1996 This book is unique in setting the question of homosexuality in its historical, legal, political, and religious contexts in North America. It is no longer possible in Catholic ethics to address sexual morality with a model of absolute moral norms immune from the ambiguities and complexities social justice issues introduce. Peddicord looks at the personal and social sides of homosexuality and fairly examines all sides of the Roman Catholic response.

Lisa Sowle Cahill, Boston College *Greater Good*

Garth L. Hallett, 1995-09-01 Garth L. Hallett provides the first thorough systematic exposition and defense of proportionalism in Christian ethics. Prominent in both philosophical and theological ethics, proportionalism judges the morality of acts by their proportion of good and evil. Hallett proposes judging acts using a norm he calls Value Maximization. He defines this norm and offers a full response to such critics of all forms of proportionalism as Finnis and Grisez. The author assesses the norm's moral and theological validity in and of itself in dialogue with the encyclical *Veritatis Splendor* and in comparison with various rival viewpoints stressing natural law, divine commands, respect for persons, inviolable goods, proportionate ends, irreducible rights, and agent-centered ethics. He appraises the norm's overall significance, showing its rootedness in Christian tradition, its inclusiveness and amplitude, and its relevance to those seeking a foundation for Christian ethical thought and moral activity.

Paul Ramsey's Political Ethics David T. E. Attwood, 1992 This is a good book that will well serve both students who are new to Ramsey and those who might not be better acquainted with his work.

THE JOURNAL OF RELIGION *The Dependent Elderly* Luke Gormally, 1992-08-28 A distinguished team of contributors from the fields of medicine, philosophy, and law address some of the issues which arise over the provision of care for dependent elderly patients. Some of the chapters are concerned with the challenge of achieving good quality medical care, the chronic inadequacies of policy making in the UK context, and the prospects for improvement in the medium term. Other chapters look at some of the threats to dependent elderly patients posed by longer-term social and ideological trends which find expression in proposals

for age limits to health care advocacy of living wills and euthanasia arguments for withdrawing tube feeding from certain categories of patient and certain proposals for resource allocation This interdisciplinary volume will have a wide appeal to those involved in care of the dependent elderly to health policy analysts and health care economists and to bioethicists

The Sexual Person Todd A. Salzman, Michael G. Lawler, 2008-05-21 Two principles capture the essence of the official Catholic position on the morality of sexuality first that any human genital act must occur within the framework of heterosexual marriage second each and every marriage act must remain open to the transmission of life In this comprehensive overview of Catholicism and sexuality theologians Todd A Salzman and Michael G Lawler examine and challenge these principles Remaining firmly within the Catholic tradition they contend that the church is being inconsistent in its teaching by adopting a dynamic historically conscious anthropology and worldview on social ethics and the interpretation of scripture while adopting a static classicist anthropology and worldview on sexual ethics While some documents from Vatican II like *Gaudium et spes* the marital act promotes self giving by which spouses enrich each other gave hope for a renewed understanding of sexuality the church has not carried out the full implications of this approach In short say Salzman and Lawler emphasize relationships not acts and recognize Christianity's historically and culturally conditioned understanding of human sexuality *The Sexual Person* draws historically methodologically and anthropologically from the best of Catholic tradition and provides a context for current theological debates between traditionalists and revisionists regarding marriage cohabitation homosexuality reproductive technologies and what it means to be human This daring and potentially revolutionary book will be sure to provoke constructive dialogue among theologians and between theologians and the Magisterium

Christian Ethics Judith Caron, 2001-12-27 Christian Ethics focuses on understanding the relationship between one's ethical self society's rules and the consequences of one's actions It operates from a Judeo Christian perspective that also takes into account the ethical system of other major world religions Christian Ethics draws from philosophy theology and psychology It considers the roles of personality development conscience formation gender difference religious values and social structures in ethical decision making It probes the questions and dilemmas of good vs evil personal vs communal values authority vs conscience religion vs society and civil vs moral law Examples and case studies drawn from the fields of social medical sexual business political environmental and personal ethics are used throughout the book and illuminate the process for personal decision making
