should agree with Jacob 1974 who observed that Contrary to what is imagined biology is not a unified science Biology is essentially concerned with living things and we should be reluctant to assume that at anyone time our concept and understanding of life are complete and incapable of further refinement And it seems clear that much of the continuing refinement of biological categories will be stimulated by advances in systems theory and in particular by those advances that relate to the rapidly expanding world of computing and robotics We should also remember what Pant in 1968 said in a different context the biological sciences are unrestricted and their investigator must be prepared to follow their problems into any other science whatsoever **Dashes at Life with a Free Pencil** Nathaniel Parker Willis,1845 Boys' Life ,1978-08 Boys Life is the official youth magazine for the Boy Scouts of America Published since 1911 it contains a proven mix of news nature sports history fiction science comics and Scouting Free Prisoners.
