

A group of seven people, four men and three women, are gathered around a dark wooden table. They all have serious or concerned expressions. In the foreground, several smartphones are scattered on the table. One smartphone, which is white, is the only one with its screen lit up, displaying a blue notification icon and the text "Vous avez un message" (You have a message). The background is dark and out of focus, suggesting an indoor setting like a library or office.

Nothing To Hide:

The Privacy Fallacy Ignacio Cofone, 2023-11-15 Our privacy is besieged by tech companies. Companies can do this because our laws are built on outdated ideas that trap lawmakers, regulators, and courts into wrong assumptions about privacy, resulting in ineffective legal remedies to one of the most pressing concerns of our generation. Drawing on behavioral science, sociology, and economics, Ignacio Cofone challenges existing laws and reform proposals and dispels enduring misconceptions about data-driven interactions. This exploration offers readers a holistic view of why current laws and regulations fail to protect us against corporate digital harms, particularly those created by AI. Cofone then proposes a better response: meaningful accountability for the consequences of corporate data practices, which ultimately entails creating a new type of liability that recognizes the value of privacy.

The Individual and Privacy Joseph A. Cannataci, 2016-12-05 The essays selected for this volume reflect the many paths followed to develop a new, more robust methodology, idMAPPING, for investigating privacy. Each article deals with the three dimensions of time, space, and place by addressing a number of questions such as: who? Which individual? When? How? Is privacy viewed from the perspective of legal theory or of information science? Or from the viewpoint of sociology, social psychology, philosophy, information ethics, or data protection law? The reader is offered a multi-disciplinary overview of the subject, a mosaic made up of several snapshots taken at different times by different scholars with different points of view. The detailed introduction increases clarity in parts of the picture where the way that the pieces fit together may not be immediately apparent and concludes by challenging internet-era fallacies. Taken together, the articles demonstrate an innovative approach to evidence-based policy making and show privacy scholarship at its best.

The Culture of Surveillance David Lyon, 2018-05-21 From 9/11 to the Snowden leaks, stories about surveillance increasingly dominate the headlines. But surveillance is not only done to us; it is something we do in everyday life. We submit to surveillance believing we have nothing to hide. Or we try to protect our privacy or negotiate the terms under which others have access to our data. At the same time, we participate in surveillance in order to supervise children, monitor other road users, and safeguard our property. Social media allow us to keep tabs on others as well as on ourselves. This is the culture of surveillance. This important book explores the imaginaries and practices of everyday surveillance. Its main focus is not high-tech organized surveillance operations but our varied, mundane experiences of surveillance that range from the casual and careless to the focused and intentional. It insists that it is time to stop using Orwellian metaphors and find ones suited to twenty-first-century surveillance. From *The Circle* or *Black Mirror*, surveillance culture, David Lyon argues, is not detached from the surveillance state, society, and economy. It is informed by them. He reveals how the culture of surveillance may help to domesticate and naturalize surveillance of unwelcome kinds and considers which kinds of surveillance might be fostered for the common good and human flourishing.
