Notre Continent Notre Avenir:

, **The Art of Commemoration** Titus Ensink, Christoph Sauer, 2003-11-27 The Art of Commemoration focuses on a particular historical event that illustrates how nations define their own identities and establish mutual relations in their discourse the Warsaw Uprising of August 1944 and its Commemoration in 1994 This Commemoration was an innovative and unique form of transnational communication because it brought together representative speakers from all parties involved They considered the commemorated event from different perspectives the victim Poland the former enemy Germany and the former allies England USA France and other countries as well as Russia which liberated Poland but had not supported the Uprising A letter from the Pope added a Catholic perspective The art of commemoration consists in invoking the past events from one's own perspective while simultaneously considering the other perspectives as well as in making sense of the past and present at the same time This volume analyses the artful way in which the speakers coped with these complexities in a full discourse analytic reconstruction of each address

Gender, Science and Technology: Perspectives from Africa Wawasi Kitetu, 2008-03-15 This sixth volume of the CODESRIA Gender Series is a collection of discourses perspectives practices and policies on the role of the female gender in science and technology particularly in the African context Although widely advocated as the indisputable foundation for political and economic power in the modern world science and technology remains marked by various layers and dimensions of gender inequality that work to the disadvantage of girls and women Despite the fact that a lot of awareness has been created and gender issues are now more readily acknowledged by various development initiatives in Africa participation in science and technology still remains a hurdle as far as girls and women are concerned A common theme that runs through the book is how feminine identities ideologies of domesticity and gender stereotypes and the inadequacy or lack of clear policies facilitate the invisibility of women in science and technology This notwithstanding women have never ceased devising clever and ingenious ways that would enable them to master nature from the margins The book provides a window onto the current state of female participation in science and technology in Africa along with an analysis of the historical backgrounds current educational and professional contexts and prospects for the future While it is evident that more research needs to be done with more groups in different regions this volume brings together a rich and inspiring collection of qualitative insights on gender science and technology in Africa The CODESRIA Gender Series acknowledges the need to challenge the masculinities underpinning the structures of repression that target women The series aims to keep alive and nourish African social science research with insightful research and debates that challenge conventional wisdom structures and ideologies that are narrowly informed by caricatures of gender realities It strives to showcase the best in African gender research and provide a platform for emerging new talents to flower
